
Cougar Sighting at the Hannon Library

MAKING A DOCS ANNIVERSARY COUNT!

DEPOSITORY LIBRARY CONFERENCE 10/21-10/23, 2019

Southern Oregon University's Hannon Library

C. Monuments Under Review

Monument	Location	Year	Federal Acreage (Est.)
Basin and Range	Nevada	2015	703,585
Bears Ears	Utah	2016	1,353,000
Berryessa Snow Mountain	California	2015	330,780
Canyons of the Ancients	Colorado	2000	176,370
Carrizo Plain	California	2001	211,045
Cascade Siskiyou	Oregon	2000/2017	113,431
Craters of the Moon	Idaho	1924/2000	738,420
Giant Sequoia	California	2000	328,315
Gold Butte	Nevada	2016	296,937
Grand Canyon-Parashant	Arizona	2000	1,021,030
Grand Staircase-Escalante	Utah	1996	1,866,331
Hanford Reach	Washington	2000	194,450
Ironwood Forest	Arizona	2000	129,055
Katahdin Woods and Waters	Maine	2016	87,564
Mojave Trails	California	2016	1,600,000
Organ Mountains-Desert Peaks	New Mexico	2014	496,529
Rio Grande del Norte	New Mexico	2013	242,710
Sand to Snow	California	2016	154,000

THE SECRETARY OF THE INTERIOR
WASHINGTON

MEMORANDUM FOR THE PRESIDENT

FROM: RYAN K. ZINKE

SUBJECT: Final Report Summarizing Findings of the Review of Designations Under the Antiquities Act

www.doi.gov/sites/doi.gov/files/uploads/revised_final_report.pdf

Planning

October 2016 – Germ of an idea and choosing a date, first contact with BLM speaker, Christine Beekman, Interpretive Specialist for the Cascade Siskiyou National Monument

May 2017 – Started to round up more accomplices

November 2017 – First group meeting to solidify plans

April 26, 2018 – Event: Hannon Library Celebrates 65 Years.

Final list of presenters

Christine Beekman M Ed – BLM Cascade-Siskiyou National Monument's Interpretive Specialist

Jeff LaLande PhD - former US Forest Service archaeologist and historian

Michael Parker PhD - aquatic ecologist, professor, former chair of the SOU Biology Program

Chelsea Rose - historical archaeologist with the SOU Laboratory of Anthropology (SOULA)

Jad D'Allura PhD - Emeritus – taught geology at SOU for 33 years

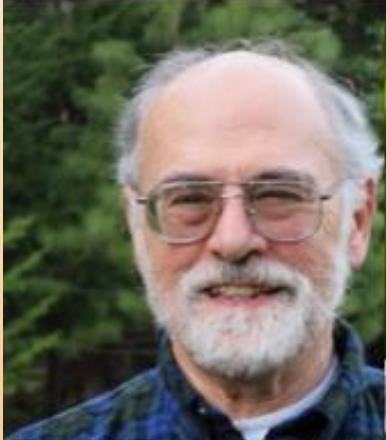

Linda Hilligoss M Ed – Instructor in SOU Environmental Education Program

Stewart Janes, Ph D. - professor of Environmental Education at SOU

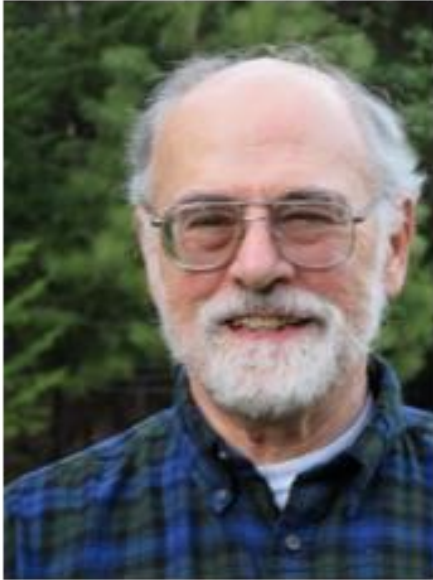

Dotty Ormes, MLS, MA Ed., is the Government Information/Instruction Librarian

Hope Braithwaite Graduate Student

Suphasiri Muttamara Graduate Student

Six Faculty Presenters

Jad D'Allura earned his Ph.D. in geology from UC Davis. He worked for Texaco, spent a summer working at the JPL on earth imagery, and taught geology at SOU for 33 years before retiring. He currently teaches part time and supports the excellent SOU Chemistry Department. He has been working in the Cascade-Siskiyou National Monument for most of his career and has finished a general map of the original Monument. He continues to work there with UO geology students every summer since 2014.

Stewart Janes, Ph D. is professor of Environmental Education at SOU. His research interests include ornithology and the function of bird songs, raptor ecology, and the impact of forest management practices on bird populations.

Linda Hilligoss joined the SOU faculty in 2001 after teaching in the public schools and working in the field of environmental education. She currently holds a joint appointment in the School of Education and the Environmental Education department. She teaches classes in Curriculum, Instruction and Assessment, STEM Methods and a variety of Environmental Education coursework and program co-coordination. Linda also worked with Crater Lake National Park as the Education Coordinator for the Science & Learning Center and serves on state and national committees to promote science and environmental education. Her research areas are in place-based education and teacher professional development with a focus on helping educators use the outdoors as an engaging learning laboratory.

Michael Parker is an aquatic ecologist, professor and former chair of the Biology Program at SOU where he teaches courses in Aquatic Ecology, Fish & Fisheries, Vertebrate Natural History and Herpetology. A former student at SOU, he returned and has served on the faculty for 24 years. His research focuses on the conservation of aquatic organisms and the environments that sustain them. He has been actively involved in research within the Cascade-Siskiyou National Monument, including a long-term study of a rare and federally-listed population of Oregon spotted frogs.

Chelsea Rose is an historical archaeologist with the Southern Oregon University Laboratory of Anthropology (SOULA). She focuses her research on the settlement and development of the west.

Two Government Agency Presenters

Christine Beekman has served as Cascade-Siskiyou National Monument Interpretive Specialist since 2015. She spent 12 years as the Chief of Interpretation at Pecos National Historical Park near Santa Fe, New Mexico. Prior, she had the good fortune to be the Education Specialist for what is known as the Southeast Utah Group of National Parks (i.e. Arches and Canyonlands National Parks, Hovenweep and Natural Bridges National Monuments). Christine has a M.Ed. in Science Education and BS in Environmental Science. Christine and husband, Dave Dawson, have two children in college - son Max is a freshman at SOU - and love to hike, ski, camp and backpack.

Jeff LaLande graduated from Georgetown University in 1969 and later earned a PhD in American history at the University of Oregon. A resident of the Rogue River Valley for nearly 50 years, he had a 30--year career with the US Forest Service as an archaeologist and historian. The author of several books and a number of published articles on the history of the region, Jeff enjoys exploring the mountains of southern Oregon and northern-most California, including off-trail hiking in the Cascade-Siskiyou National Monument.

Two Graduate Student Presenters

Hope Braithwaite came to Southern Oregon University because she wanted to further her education in natural history and teaching in a place that had excellent outdoor opportunities. She enjoyed education and biology courses, designing and implementing an environmental education program with her colleagues, and conducting research on dragonflies and damselflies of the Cascade-Siskiyou National Monument. After graduation, she hopes to find a career that brings together her love of research with environmental education.

Suphasiri Muttamara (a.k.a. **Jam**) is from Bangkok, Thailand. It has always been her dream to work in nature. After receiving a bachelor's degree in Conservation Biology (B.S.) from Mahidol University, Thailand, she worked with the United Nations Development Program (UNDP) as a project junior consultant. She worked with students in local schools in the mountains of the Northern region of Thailand, to develop ecotourism, and a curriculum that included the forest ecosystem that influences the community. Realizing education is the best way to conserve nature; she is now a graduate student in the M.S. in Environmental Education program at SOU.

Art of the Cascade-Siskiyou

Matt Witt - photographer and writer in Talent, OR

Mabrie Ormes – Professional artist (oil painting) in Ashland OR

Darlene Southworth - SOU Professor Emerita of Biology and watercolorist

SOU and city of Ashland respond to cougar sightings

October 29, 2018 / in [Campus News](#) /

Southern Oregon University and the city of Ashland are working with state and federal wildlife officials to ensure safety on the SOU campus and in the community following multiple cougar sightings and confrontations Sunday night and this morning.

The Ashland Police Department will respond promptly to future cougar sightings, with officers' actions based on immediate danger to humans or domesticated animals. Factors may include whether the sightings occur at night or during the day, when the animals aren't typically seen.

Students leaving SOU's Hannon Library at about 10:30 p.m. Sunday reported seeing a cougar. Ashland Police and [SOU Campus Public Safety](#) officers responded and were able to scare away a small cougar they found just outside the library.

Ashland map shows cougar, bear sighting spots

...That is certainly the case with our legislation today. I am Chairman—the Cascade-Siskiyou National Monument Voluntary
and Sustainable Grazing Conflicts Resolution Act—it's a mouthful,
it's important.
I'd like to let Mike and... their perspectives on the
background of the Monument... the future of grazing.
As for my part, it was... ago that a small and
uniquely, and unlikely, group of ranchers and environmentalists
came to me and my staff—... they did with you, as well,
Senator Wyden—they said they... common ground in avoid-
ing a legal collision course between grazing operations and the
Clinton Administration's Proclamation of the Cascade-Siskiyou Na-
tional Monument.

The 2000 declaration of the National Monument was controversial at the local level, as many similar proclamations were. Concerns about the future of grazing topped the list—and they still do. The Cascade-Siskiyou is the only Monument Proclamation that addresses livestock grazing in such deliberate specifics. As a result, grazing allotment holders, like Mike, within this National Monument face one of the most complex webs of Federal environmental regulation of anywhere in the country. That entanglement is not of their choosing—it was the choosing of the past Ad-

Question. Before the Cascade-Siskiyou National Monument was designated much of its area was protected as the BLM's only ecological emphasis area (EEA): the Cascade-Siskiyou Ecological Emphasis Area. In a rare and refreshing cooperative venture, U.S. Timberland and local conservationists approached me about securing \$500,000 in appropriated funds to acquire, for BLM, 560 acres of key U.S. Timberlands properties on the southeast slopes of Soda Mountain, next to BLM's recommended-for-wilderness Soda Mountain Wilderness Study Area. The Weyerhaeuser Corporation, which owns the mineral rights to that land, was also in favor of the deal. Though I was able to secure \$250,000 towards this purchase in the FY 2000 Senate Interior Appropriations bill, the House Appropriations Committee cut funding for the project entirely on the grounds that "BLM didn't want that land." BLM told us they would pursue this project with us in the future. They haven't. Ms. Clarke, it's not every day that big timber companies and local conservationists in my state agree on a course of action. When they do, I want to encourage such cooperation. What's become of our request that BLM prioritize the purchase of these Soda Mountain lands from U.S. Timberlands?

Answer. I am not familiar with this proposal. If confirmed, I will review the issue, and work with you on it.

Question. There are other willing sellers in the Cascade-Siskiyou National Monument, as well. The local BLM has a file of property owners who have contacted BLM on their own initiative. What assurances will you give me that BLM will prioritize acquisitions from willing sellers in the Cascade-Siskiyou National Monument?

Answer. I understand BLM has a long standing policy that it will only acquire lands from willing sellers. If confirmed, I intend to continue this course on all BLM managed lands, as

Oregon
Wilderness Act
of 1984.
National
Wilderness
Preservation
System.
National Forest
System.

To designate certain national forest system and other lands in the State of Oregon for inclusion in the National Wilderness Preservation System, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "Oregon Wilderness Act of 1984".

SEC. 2. (a) The Congress finds that—
(1) many areas of undeveloped National Forest System land in the State of Oregon possess outstanding natural characteristics which give them high value as wilderness and will, if properly preserved, contribute as an enduring resource of wilderness for the benefit of the American people;

(2) the Department of Agriculture's second roadless area review and evaluation (RARE II) of National Forest System lands in the State of Oregon and the related congressional review of such lands have identified areas which, on the basis of their landform, ecosystem, associated wildlife, and location, will help to fulfill the National Forest System's share of a quality National Wilderness Preservation System; and

(3) the Department of Agriculture's second roadless area review and evaluation of National Forest System lands in the State of Oregon and the related congressional review of such lands have also identified areas which do not possess outstanding wilderness attributes or which possess outstanding energy, mineral, timber, grazing, dispersed recreation and other values and which should not now be designated as components of the National Wilderness Preservation System but should be available for nonwilderness multiple uses under the land management planning process and other applicable laws.

(b) The purposes of this Act are to—
(1) designate certain National Forest System lands and certain public lands in the State of Oregon as components of the National Wilderness Preservation System, in order to promote, perpetuate, and preserve the wilderness character of the lands, protect watersheds and wildlife habitat, preserve scenic and historic resources, and promote scientific research, primitive recreation, solitude, physical and mental challenge, and inspiration for the benefit of all the American people, to a greater extent than is possible in the absence of wilderness designation; and

(2) insure that certain other National Forest System lands in the State of Oregon be available for nonwilderness multiple use.
SEC. 3. In furtherance of the purpose of the Wilderness Act the following lands in the State of Oregon comprising approximately eight hundred fifty thousand six hundred acres and as generally depicted on maps appropriately referenced, dated May 1984, are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

About the Bioregion Collection

The Southern Oregon Klamath-Siskiyou Bioregion is recognized by scientists around the world as an area that is uniquely rich in plant and animal species. In 1983 the United States Forest Service proclaimed it one of the seven areas of global biotic significance on the North American continent (Portland Oregonian, 1/3/83). It is particularly diverse in plant species due in part to the region's complex geology including the high mineral content serpentine soils in the Coast Range. The wide variation in climate and topography also contributes to the region's abundant life forms. According to the World Wildlife Fund (The Klamath-Siskiyou Forests, Nov 2000) the region varies among the most biologically diverse temperate coniferous forest ecoregions in the world and is home to more than 3,500 plant species, 281 of which are unique. The area is often the edge of a zone or almost a range it is the southernmost reach of many northern and Cascade species and the northernmost reach of northern California species.

Bibliostion
 Texts of field work from government agencies and scientists predominate in the 2815-titled Southern Oregon Digital Archives collection about the Klamath-Siskiyou Bioregion (Southern Oregon and Northern California).

Bombilidae Collection (SOI Insect Museum)
 Images and collection data for bombilidae specimens (Bombus sp.) collected within the Klamath-Siskiyou Bioregion of Southern Oregon and Northern California and other sites in North America.

Butterfly Collection (SOI Insect Museum)
 Images and collection data for butterfly specimens (Lepidoptera sp.) collected mostly in Oregon's Cascade-Siskiyou National Monument and the surrounding Klamath-Siskiyou bioregion of Southern Oregon and Northern California.

Dean and Marc Collins Collection
 Images of material culture, art and craft objects collected by Dean and Marc Collins from travels in the American Southwest from their larger collection situated in SOU.

Ecot. Station
 Geographic and government document texts predominate in this 2815-titled Southern Oregon Digital Archives collection about the Indigenous peoples, cultures and languages of Southwest Oregon and Northern California.

Geometric in our World
 Images of geometers of nature and in human-made objects from what was originally a teaching slide collection by SOU Mathematics Professor Emeritus John Englandert.

Jim Rock Museum, Can Collection
 Images of historic "Tin" cans assembled by U.S. Forest Service archeologist Jim Rock (1940-2001) with documentation for using them to type and date cans in historical archeology.

Thank You!

Dotty Ormes, MLS, MA Ed., is the Government Information/Instruction Librarian at the Hannon Library. She also covers the subject specialties of Art, English, Political Science, Theater and Shakespeare Studies. While at New Mexico State University in 2010, she produced a 100th anniversary Federal Depository Library Anniversary event. Dotty is a strong believer in free public access to government information. She created the Hannon Library's 65th anniversary event to promote unique government resources that are available for Southern Oregon University faculty and student research and for the public at large.

- Dotty Ormes, Southern Oregon University
