

## CGP of the Future – Chat Log

---

---Begin Transcript---

### Chat

**Elizabeth McDonald** -> All Participants: am i muted?  
**Ashley Dahlen** -> All Participants: Oh my! Has it been that long?! I can remember when it rolled out!  
**Tekla Slider** -> All Participants: How exciting!  
**Cindy Etkin** -> All Participants: Poll A: In your position, what is your primary area of responsibility?  
(select all that apply)  
**Paivi Rentz** -> All Participants: Circulation, ILL  
**Larayne Dallas** -> All Participants: liaison  
**Barbara Costello** -> All Participants: Interlibrary Loan  
**Valerie Glenn (Council)** -> All Participants: department head  
**Andrea Morrison** -> All Participants: LIS professor  
**Jenny Groome** -> All Participants: Oh yes Circ too  
**Tien Triggs** -> All Participants: Circulation, gov pubs processing, reference  
**Cindy Etkin** -> All Participants: Poll B: How often do you use the CGP?  
**Patricia A. Duplantis** -> All Participants: Yes, Ashley. The current CGP was launched March 9, 2006.  
**Alice Sherwood** -> All Participants: I must say I use more than 10 times a day  
**Tien Triggs** -> All Participants: Agree with @Alice  
**Michael Maben** -> All Participants: For what purposes do you access the CGP?  
**Mark Hamilton** -> All Participants: 1) find items for library patrons, 2) identify shipping list numbers for physical items we have not received, where we have new catalog records from Marcive, 3) find what has been distributed under a given item number, 4) find out what format GPO has cataloged an item under, i.e., cartographic, monograph, continuing resource 5) review New Electronic Titles, 6) check for call number changes  
**Alice Sherwood** -> All Participants: Check if it has a purl I can attach to as I am weeding  
**Libby McDaniel** -> All Participants: verify SuDoc numbers  
**james jacobs** -> All Participants: as the first step in the "unreported" docs process  
**John Olson** -> All Participants: links to full text  
**Laura Tolliver** -> All Participants: PURLs,, reference, cataloging  
**Perveen Rustomfram** -> All Participants: To verify a SuDoc #  
**Janelle Breedveld** -> All Participants: Looking for links to digitized materials for patrons  
**Brent Abercrombie** -> All Participants: Verify SuDoc numbers  
**Chad Deets** -> All Participants: SuDoc number authority/research  
**Jim Gillispie** -> All Participants: links to full-text  
**Amanda McLeod** -> All Participants: finding items for library users/reference questions  
**Mary Clark** -> All Participants: known item searching  
**Jen Kirk (Council)** -> All Participants: Identifying whether an item is in scope, for a basis for copy cataloging materials, verifying SuDoc call numbers  
**Angela Bonnell** -> All Participants: links to full text  
**Kimberly Wirth** -> All Participants: Check for online versions of tangible items.  
**Libby McDaniel** -> All Participants: find records when there are too many choices in OCLC searches  
**Tabitha Carr** -> All Participants: confirming titles and sudoc #

**Joshua Lambert** -> All Participants: To assist with processing/cataloging items.

**Hannah Moyer** -> All Participants: verification of PURLs; weeding projects;

**Laurie Hall** -> All Participants: At GPO, we answer lots of reference questions for Congressional inquiries

**Claudene Sproles** -> All Participants: Verifying bibliographic data

**Katie Fearer** -> All Participants: To find the status of a publication, and look for a PURL

**Janelle Breedveld** -> All Participants: And to find a SuDoc #

**Bert Chapman** -> All Participants: Seeing newly cataloged digital publications.

**Mary Clark** -> All Participants: sudoc numbers

**Scott Briggs** -> All Participants: Verify SuDoc Numbers

**David Isaak** -> All Participants: Verify SuDoc numbers; Get a good OCLC number for a good bib.

**JoAnna McCulley** -> All Participants: Accessing the new titles list. Collection Development. Finding docs for patrons.

**Wanda Adams** -> All Participants: Checking online access in the course of print weeding.

**Jim Noel** -> All Participants: Preview what it coming in cataloging

**Jenny Groome** -> All Participants: o To find PURLS for research guide links. o To double check old/corrected o Look up item that confuses me in our catalog or in U.S. Documents Masterfile ~38#xF0A7; For items not very current, I tend to search U.S. Documents Masterfile because it searches across older indices and agency databases ~38#x2013; with links to Internet Archives, HathiTrust, etc. o Show patron how to see if a closer library might have the physical item o Double check name change if Andriot didn't answer my question o If I want to save a number of items on ~38#x201C;my bookshelf~38#x201D;

**Vicki Tate (Council)** -> All Participants: Too many reasons to list

**Sinai Wood** -> All Participants: shipping list #

**Becki White** -> All Participants: Item # and/or Sudoc information on an item in our collection that lost its label.

**Jim Gillispie** -> All Participants: find known items

**Laura Sare (Council)** -> All Participants: To find the status of a publication, to find a PURL

**Alicia Kubas** -> All Participants: verify/find SuDocs, reference work, online access

**Aimee Quinn (Council)** -> All Participants: Items for patrons, verifying bibliographic data, verifying PURLS, etc.

**Patsy Stephenson** -> All Participants: weeding tool

**William Sleeman** -> All Participants: identify e versions

**David Isaak** -> All Participants: Title changes for serials

**Susanne Caro** -> All Participants: finding purls, materials not in our collection, sudoc number changes

**Jenny Groome** -> All Participants: PURLS is number 1

**John Moreland** -> All Participants: Jennifer's class

**Keven McGinn** -> All Participants: VERIFYING SuDoc Numbers, checking Serials, PURL Verification, etc.

**Jenny Groome** -> All Participants: OH yes - Unreported docs -- thanks James

**Ella Shurr** -> All Participants: 1-records for older, uncataloged items.

**Jen Kirk (Council)** -> All Participants: identifying needs in my collection (gap fills)

**Tabitha Carr** -> All Participants: I also use it to find which OCLC record is preferred

**Lorri Pickett** -> All Participants: Finding SuDoc numbers

**Kenna Cathcart** -> All Participants: collection management - know if something exists

**Tien Triggs** -> All Participants: All the above reasons but especially for checking mono to serial record changes

**Thomas Fischlschweiger** -> All Participants: Weeding/cataloging, superseded items, and lots more

**Beth Downing** -> All Participants: Verify GPO cataloging before asking GPO for updated cataloging as

records in OCLC have often been updated by others, possibly incorrectly.

**Timothy Woodard** -> All Participants: Check SuDoc number..

**Elizabeth Eckert** -> All Participants: docs for displays, oclc, sudoc # verification

**Jen Kirk (Council)** -> All Participants: +1 Tabitha and Tien

**Jim Gillispie** -> All Participants: Search by keyword or title.

**Becki White** -> All Participants: To find out if a document in our collection was received through the FDLP or directly from the agency.

**Jenny Groome** -> All Participants: Sorry - SuDoc numbers - my cut and paste didn't work as well as I had hoped

**Joshua Lambert** -> All Participants: How: title searches

**Aimee Quinn (Council)** -> All Participants: +1 Becki

**Janelle Breedveld** -> All Participants: Search by title since searching by SuDoc rarely works for me

**Tabitha Carr** -> All Participants: I used the Advanced Search feature a lot more than general keyword search. I love being able to refine searches.

**Jim Noel** -> All Participants: Browse title is best for my usual searches

**Teri Taylor** -> All Participants: Shipping list number

**Jen Kirk (Council)** -> All Participants: How: I search by title or using the SuDoc call number (either the full call number or the stem, e.g. A 1.1:) in the advanced search

**Andrea Morrison** -> All Participants: Regular use to solve cataloging and classification problems and to identify formats (serials, maps, etc.). Check PURLS, items numbers, Shipping Lists, and agency names and more. Very heavy use when teaching LIS students. Also access to find new titles, cataloging and teaching examples, and content of personal interest.

**David Isaak** -> All Participants: All around tool for beginning to solve our "gov doc mysteries"

**Janelle Breedveld** -> All Participants: +1 David

**Laurie Hall** -> All Participants: Wow, you don't know how great this makes me feel, since Cindy and I were in on bringing this tool to GPO in 2006!

**Keven McGinn** -> All Participants: ALSO I snatch PURLs for use in older Records with no PURLS.

**Kenna Cathcart** -> All Participants: Gov Doc mysteries - ditto

**Sarah Erikson** -> All Participants: I wanted to download a list of search results for a Committee's Congressional Hearings. A search resulted in 1000+ records, but little in ways to output that list. I was hoping to use it to compare against my own excel worksheer.

**Alicia Kubas** -> All Participants: for reference quesions, i'll use the advanced search with the wildcard option to look for publications published by a particular agency under a specific SuDoc stem within the last few years

**Keven McGinn** -> All Participants: YES! It workd!

**Chris Brown** -> All Participants: I use CGP to see if I need to report a doc as a "Fugitive" (I can't remember what the new term is)

**Karina Ricker** -> All Participants: Yes -- browse by SuDoc

**DeAnn Isenhower** -> All Participants: I find it very difficult to search by su doc

**Tien Triggs** -> All Participants: I search by SuDoc call number half the time

**Beth Downing** -> All Participants: I search by sudoc all the time.

**Timothy Woodard** -> All Participants: I search by Title

**Ella Shurr** -> All Participants: I search by SuDoc numbers as well

**Sarah Erikson** -> All Participants: Yes, I had students using the call number search to find titles

**John Devine** -> All Participants: I use the CGP when I'm only given a SuDoc and want to verify if it is accurate.

**David Isaak** -> All Participants: You got to get the spacing right for SuDoc search to work.

**Abby McDermott** -> All Participants: @DeAnn, I find it easier to Browse by SuDoc

**Mark Hamilton** -> All Participants: Advanced search most often, Basic second most often.

**Andrea Morrison** -> All Participants: Yes, search by SuDoc number, usually the stem.

**Mary Clark** -> All Participants: agree about advanced search - I never use the general search...

**Wanda Adams** -> All Participants: Pull OCLC number in order to catalog.

**Susanne Caro** -> All Participants: I've used some advance searches for lists and statistics

**Karina Ricker** -> All Participants: wish OCLC# was a keyword so I didn't have to go to Advance search

**Kimberly Wirth** -> All Participants: I search by SuDoc in the advanced search more often than Title searching.

**Sandy Himel** -> All Participants: SuDoc searching works great with Browse

**Cindy Etkin** -> All Participants: @Chris -- Unreported publications

**Patricia A. Duplantis** -> All Participants: For those that mention that the SuDoc search rarely works for them, have you tried using the Browse search to search the SuDoc? If so, then maybe we can get more information about the issue with searching SuDocs so we can provide some additional assistance.

**Keven McGinn** -> All Participants: GOV DOC Mysteries? We call them the Secret Classified Collection! HA!

**Jen Kirk (Council)** -> All Participants: +1 Sarah - I would love to be able to export huge amounts of search results, I'm talking in the tens of thousands (also, Sarah your hearings list is wonderful, thanks again)

**Sarah Erekson** -> All Participants: Thanks Jen!

**Aimee Quinn (Council)** -> All Participants: +2 Sarah \* Jen

**Keven McGinn** -> All Participants: SuDoc SEARCH works!

**Jen Kirk (Council)** -> All Participants: (Can you tell that Sarah and I are a Regional depositories?)

**Alicia Kubas** -> All Participants: +! yes would love a way to export large amounts of search results

**Alicia Kubas** -> All Participants: +1

**Mark Hamilton** -> All Participants: Alicia +1

**Jenny Groome** -> All Participants: @Patricia - I search by SuDoc in Advanced search and limit to SuDoc field

**Cindy Etkin** -> All Participants: @Patricia - Good tip!

**Libby McDaniel** -> All Participants: yes! OCLC # as keyword would be great

**David Isaak** -> All Participants: +1

**Chad Deets** -> All Participants: I didn't even know you could browse by sudoc - is there a resource with other insider tips like this?

**james jacobs** -> All Participants: hate that search results only come 10 at a time.

**Jenny Groome** -> All Participants: Yes, search by SuDoc number, usually the stem. from Jenny Groome to Stephen Kharfen (privately): ~38#x2022; How do you most often begin your search in the CGP? o Depends on the search. o If I have a distinct title, I~38#x2019;ll use a ~38#x201C;phrase~38#x201D; search in basic search o I almost always go to Advanced search

**Vicki Tate (Council)** -> All Participants: Tip for searching SuDoc--don't put a space between the colon in the stem with the item portion.

**Aimee Quinn (Council)** -> All Participants: +1 James Jacobs, hate the 10 limit

**Oksana Osborne** -> All Participants: @Janelle: There is a known problem where the CGP search results will display the \*1st\* SuDoc in a bib record, even when a 2nd SuDoc field contains the most current number. So that could possibly explain some of the off-looking results you get.

**Jenny Groome** -> All Participants: Apologies - my chat keeps going to specific people on private message. I don't know why this happens - I am not changing it

**Jen Kirk (Council)** -> All Participants: When I encounter issues with SuDoc search, it's usually for older publications (pre-1960)

**Margaret Sylvia** -> All Participants: I agree with James, I wish we could display more than 10 results at a

time.

**Sarah Erikson** -> All Participants: +1 give more results per page

**Brent Abercrombie** -> All Participants: +1 more results per page

**Patricia A. Duplantis** -> All Participants: We will be updating our CGP Help page to be anticipated to be released by the end of 2021. It will have some Browse search tips.

**Jenny Groome** -> All Participants: okay - how do we save chat and all these tips? In Zoom there is a button - I don't see anything like that in WebEx

**Abby McDermott** -> All Participants: @Jenny - it happens when you accidentally scroll down sometimes with your cursor over the Send to: box.

**Susanne Caro** -> All Participants: the 2000 limit on results :(

**Jenny Groome** -> All Participants: Let us choose - 10, 25, 50, 100

**Jenny Groome** -> All Participants: Thanks Abby!!

**Janelle Breedveld** -> All Participants: @Patricia, can you provide guidance on how you use the Browse search option? I don't see that on the CGP landing page.

**Keven McGinn** -> All Participants: @Jenny AGREE!

**Jenny Groome** -> All Participants: THanks - didn't know chat was saved

**Lawana Gladney** -> All Participants: GREAT!!!

**Jenny Groome** -> All Participants: The buttons at the very top of the page needs to be down by the search and results

**Jennifer Lindley** -> All Participants: you can also right click and select all to copy and paste all the chat so far

**Susanne Caro** -> All Participants: Thank you to Stephen Kharfen for helping me with CGP questions.

**Janelle Breedveld** -> All Participants: Thanks Patricia!

**Kristina Bobe** -> All Participants: I click on Preferences and select 20 and get 20 results per page..did I miss something? multitasking here

**Jenny Groome** -> All Participants: Jennifer Lindley - I do that - but this is too fast

**Beth Downing** -> All Participants: I did not know that there was a browse, I almost always use Advanced search and choose the section I want to search, sudoc, title, OCLC number, etc.

**Sarah Erikson** -> All Participants: Better sorting options, sometimes author sort would help

**Andrea Morrison** -> All Participants: Good to hear Help is being updated -- it's really needed! More examples please!

**Jenny Groome** -> All Participants: Sarah - Corporate author - or person?

**Cindy Etkin** -> All Participants: Poll C: How do you most often search the CGP? Select your top three methods.

**Mark Hamilton** -> All Participants: Other: OCLC number

**Karina Ricker** -> All Participants: Other: OCLC#

**Beth Downing** -> All Participants: OCLC number and CGP System number

**Valerie Glenn (Council)** -> All Participants: Other: keyword

**Susan Cole** -> All Participants: OCLC #

**Bert Chapman** -> All Participants: Keyword(s) is by far the most common search method.

**Jenny Groome** -> All Participants: It depends on the search! Isn't that the correct reference answer?

**Christine Dorribo** -> All Participants: BINGO

**Aimee Quinn (Council)** -> All Participants: OCLC # and CGP #

**Margaret Sylvia** -> All Participants: I use keyword most commonly.

**Jenny Groome** -> All Participants: I search in advanced search 90% of time. Lets me limit by field

**Blaine Redemer** -> All Participants: shipping list

**Keven McGinn** -> All Participants: ALSO Title Keywords

**Tien Triggs** -> All Participants: +1 Kevin

**Cindy Etkin** -> All Participants: @Christine - Congrats on the BINGO!  
**Mark Hamilton** -> All Participants: Advanced search most often, Basic search second most often  
**Beth Downing** -> All Participants: Choose  
**John Devine** -> All Participants: Click on advanced.  
**Jennifer Morgan (Council)** -> All Participants: Q2 How do you most often begin your search in the CGP  
**Bert Chapman** -> All Participants: Advanced search  
**Jenny Groome** -> All Participants: @Keven - Title keyword is option in advanced search  
**Jim Gillispie** -> All Participants: advanced search  
**Cindy Etkin** -> All Participants: How do you most often begin search the CGP?  
**Teri Taylor** -> All Participants: Browse Title  
**Jen Kirk (Council)** -> All Participants: Advanced search most often  
**Kimberly Wirth** -> All Participants: Advanced search  
**Susan Cole** -> All Participants: advanced search  
**Aimee Quinn (Council)** -> All Participants: Advanced, browse, basic  
**Elizabeth Eckert** -> All Participants: advanced search  
**Amy Ruhe** -> All Participants: Basic  
**Becki White** -> All Participants: Advanced search almost always  
**Beth Downing** -> All Participants: Choose advanced  
**Katie Fearer** -> All Participants: Advanced search  
**John Olson** -> All Participants: advanced search  
**Laura Tolliver** -> All Participants: advanced for internet access to verify purls  
**Tien Triggs** -> All Participants: Advanced  
**Andrea Morrison** -> All Participants: general keyword, if not successful I go right to advanced search  
**Joshua Lambert** -> All Participants: basic search  
**Alice Sherwood** -> All Participants: Advanced, basic  
**JoAnna McCulley** -> All Participants: advanced  
**Sheila Dorsey** -> All Participants: basic  
**Blaine Redemer** -> All Participants: advanced  
**Timothy Woodard** -> All Participants: Basic  
**Lorri Pickett** -> All Participants: Basic and then advanced  
**Mary Jo Heacock** -> All Participants: advanced  
**Jim Gillispie** -> All Participants: Sub catalogs  
**Ella Shurr** -> All Participants: Basic search if looking for a title, advanced if I start with the SuDoc, or OCLC  
**Asteria Ndulute** -> All Participants: Basic search  
**Brian Wert** -> All Participants: basic  
**Scott Briggs** -> All Participants: Browse by SuDoc  
**Laura Sare (Council)** -> All Participants: Basic if Title, Advanced if SuDoc  
**Brent Abercrombie** -> All Participants: Basic search, though I think moving forward, I will take advantage of the advanced features  
**Thomas Fischlschweiger** -> All Participants: Depends on what I'm searching and why  
**Jenny Groome** -> All Participants: ~38#x2022; How do you most often begin your search in the CGP? o Depends on the search. o If I have a distinct title, I~38#x2019;ll use a ~38#x201C;phrase~38#x201D; search in basic search o I almost always go to Advanced search  
**John Devine** -> All Participants: Remember that you are asking Gov Docs librarians.  
**Karina Ricker** -> All Participants: Browse for sudoc; Advanced for OCLC#; keyword for title  
**Lawana Gladney** -> All Participants: Advanced search  
**Megan Minta** -> All Participants: Browse by SuDoc

**Jenny Groome** -> All Participants: +1 @John

**William Sleeman** -> All Participants: Historic Shelflist - been using this a lot of late! Love it.

**Vicki Tate (Council)** -> All Participants: Browse if searching for title or SuDoc, but Advance if searching for OCLC# or trying to limit

**Andrea Craley** -> All Participants: I always start with Advanced Search, and then do Title Keyword

**Patricia A. Duplantis** -> All Participants: For those asking about increasing the default number of brief result records per page, we can investigate doing that in the current CGP. Also, Kristina is correct, you can select up to 20 results from the Preferences. For those FDL that login, you can set that as your default. We will note the multiple options request for the future system.

**Bert Chapman** -> All Participants: Chance to get more relevant results including links to LC Subject Headings.

**Mark Hamilton** -> All Participants: OCLC numbers, Item numbers, Sudocs for advanced. Basic for titles from patrons

**Andrea Craley** -> All Participants: If not using Title Keyword, then I search by OCLC# next

**Kimberly Wirth** -> All Participants: I'm usually looking for something specific i.e. publications attached to a specific item number.

**Andrea Morrison** -> All Participants: Most students I work with prefer the Basic Search. The the Advanced Search needs improved labels. If I have a known search, I always start with Advanced Search.

**Alicia Kubas** -> All Participants: keyword search for title or general keyword topic search; advanced search is usually by SuDoc (often with wildcard)

**Brian Wert** -> All Participants: Title in basic

**Keven McGinn** -> All Participants: I use a multi- pronged approach, and I teach this to my assistants.

**Scott Briggs** -> All Participants: Usually trying to correct class conflicts (which can show up by accident).

**Karina Ricker** -> All Participants: Usually only use CGP for known items; prefer WorldCat for researching topics

**Jenny Groome** -> All Participants: Since I tend to use other databases that search across several indexes, when I go to CGP it's because I didn't find it in other database. So I'm looking for PURLs or I have only a report number, or conference date

**Jennifer Morgan (Council)** -> All Participants: +1 Jenny

**Aimee Quinn (Council)** -> All Participants: If I am showing users the CGP, I start with basic search and then explain the difference between advanced and browse and when to use each. If I am doing work outside of reference/instruction, I start with advanced or expert search or browse depending upon my task.

**Jenny Groome** -> All Participants: I have used Expert, but forget to. I need to remember this!

**Oksana Osborne** -> All Participants: I only use Expert search for CGP system numbers

**Tekla Slider** -> All Participants: Is there a recent webinar on using CGP for those new to FDLPs?

**Andrea Craley** -> All Participants: I too am usually using the CGP for known items., or I'm looking for PURL's

**Tekla Slider** -> All Participants: Thank you

**Tien Triggs** -> All Participants: Once I get results, I modify in the box in the bottom lefthand corner field "You can revise your search:" so I don't have to keep going back to the main search page. Great shortcut for multiple OCLC searches, just copy and past number into the field OCLC = "#####" for example

**Susanne Caro** -> All Participants: I've used expert- it is helpfull but I have to go back to the list of codes

**Mark Hamilton** -> All Participants: I second Tien

**Michael Maben** -> All Participants: What current features and functionality of the CGP do you want to keep in the new CGP?

**Andrea Morrison** -> All Participants: I use wildcards and truncation a great deal when searching agency names. I also use the Historic shelflist when searching older agencies.

**Mark Hamilton** -> All Participants: Ability to look at the MARC record (or equivalent), Sudoc sorting in the results, Holdings display for serial titles. ability to search by: OCLC#, Sudoc number, shipping list number, item number

**Jenny Groome** -> All Participants: All of them

**Aimee Quinn (Council)** -> All Participants: +1 Mark

**Jenny Groome** -> All Participants: What current features and functionality of the CGP do you want to keep in the new CGP? o Keeping connection between print record and electronic item ~38#x2013; PURLs in the records/ o Adding historic items ~38#x2013; esp Census publications o My Book shelf

**Libby McDaniel** -> All Participants: ability to view MARC records. This is hard to do in some ILSs.

**Andrea Craley** -> All Participants: I agree the Expert and Browse features need to move down - I never really noticed them at the far top of the screen

**Andrea Craley** -> All Participants: Agree - keep viewng MARC records

**Jennifer Morgan (Council)** -> All Participants: Q3: What current features and functionality of the CGP do you want to keep in the new CGP?

**Bert Chapman** -> All Participants: Retain PURLS and LC subject headings

**David Isaak** -> All Participants: Ability to see the MARC record. A lot of discovery layers have removed this function.

**Jim Gillispie** -> All Participants: Keep including records for governemt agency blogs

**Beth Downing** -> All Participants: definitely MARC view

**Tekla Slider** -> All Participants: New titles tab

**Karina Ricker** -> All Participants: BROWSING!!! Newer discovery layers do not do this well.

**Katie Fearer** -> All Participants: Ability to easily export list of new electronic docs

**William Sleeman** -> All Participants: Retain the individual files for more focused searching

**Chad Deets** -> All Participants: It would be cool if we could switch our default view (as in to MARC)

**Susanne Caro** -> All Participants: searching within collections

**Jen Kirk (Council)** -> All Participants: Search by SuDoc, Search by Shipping List number, retain PURLs (these things feel unique to CGP and I would hate to lose them)

**Mark Hamilton** -> All Participants: Holdings display for serial titles.

**JoAnna McCulley** -> All Participants: New title lists. Browsing. MARC view.

**Barbara Costello** -> All Participants: ability to email records

**Karina Ricker** -> All Participants: ditto MARC records

**Perveen Rustomfram** -> All Participants: New Titles

**Janelle Breedveld** -> All Participants: Definitely keep the PURLs

**Aimee Quinn (Council)** -> All Participants: MARC record view, expert and advanced searches, browse search, search by SuDocs, new titles, ability to email records

**Asteria Ndulute** -> All Participants: MARC Records

**Amy Cheek** -> All Participants: SuDoc searching

**Kenna Cathcart** -> All Participants: Yes, keep MARC, purls, and if more clarification on true serial titles, I see issues being treated as monographs.

**Aimee Quinn (Council)** -> All Participants: I would like to see a way to create folders so I can save searches along with records for each search while working on specific projects while searching before I download them

**Andrea Morrison** -> All Participants: Advanced search; Catalogs to Search; Access to MARC Recrds; Held; Browse searches. I also want to search by all the Advanced Search fields, but would like to also be able to limit by Format, which we used to be able to do.

**Kenna Cathcart** -> All Participants: that confuses me.

**Oksana Osborne** -> All Participants: @Tekla (from before the current discussion question): <https://www.fdlp.gov/subject-headings-behind-the-scenes> contains CGP search tips for subjects starting

around the 39-minute mark

**Jenny Groome** -> All Participants: Remember that Librarians use CGP differently than general public. Don't make mistake that many agencies do and change for general public and remove tolls librarians need

**Tekla Slider** -> All Participants: Thank you Oksana

**Mark Hamilton** -> All Participants: Jenny +1

**Karina Ricker** -> All Participants: @Jenny - YES!

**Alicia Kubas** -> All Participants: +1 Jenny so many agencies have awful websites for searching or finding publications now

**Jenny Groome** -> All Participants: tools we need

**Oksana Osborne** -> All Participants: that was correct, Stephen, thanks :-)

**Beth Downing** -> All Participants: Make sure that new system uses all of fixed fields. Our system only considers a record a serial if there is a MARC 222 field and does not use the fixed fields to define serials

**Kenna Cathcart** -> All Participants: good example the Presidential addresses - state of the union - it happens every year - it should be seen as serial rather as a monograph

**Aimee Quinn (Council)** -> All Participants: +1 Beth

**Andrea Craley** -> All Participants: @Oksana - thanks for that link, that will be very helpful

**Kenna Cathcart** -> All Participants: It is often assigned House Doc. No. 1

**Keven McGinn** -> All Participants: MARC Records... DEFINITELY important!

**Valerie Glenn (Council)** -> All Participants: Discussion Q4: Please tell us about functions and features that you use in your library catalog that you would like to see in the new CGP.

**Cindy Etkin** -> All Participants: Poll D: Do you currently download CGP records into your catalog?

**Jennifer Morgan (Council)** -> All Participants: Poll D: Do you currently download CGP records into your catalog?

**Jenny Groome** -> All Participants: No - but it is important to be able to see them.

**Tekla Slider** -> All Participants: Is there a way to do it directly? I always grab the OCLC number and download from there

**james jacobs** -> All Participants: not directly, but via marcive so I guess in a roundabout way yes

**Becki White** -> All Participants: I think the downloads are from CGP; the process was set up at the state level for a widely-shared ILS.

**Jennifer Morgan (Council)** -> All Participants: Discussion Q4: Please tell us about functions and features that you use in your library catalog that you would like to see in the new CGP.

**Valerie Glenn (Council)** -> All Participants: Discussion Q4: Please tell us about functions and features that you use in your library catalog that you would like to see in the new CGP.

**Michael Maben** -> All Participants: Please tell us about functions and features that you use in your library catalog that you would like to see in the new CGP.

**Scott Matheson** -> All Participants: Well... not directly, but GPO records via CRDP and OCLC

**Amy Ruhe** -> All Participants: I usually grab the OCLC number from the CGP

**Ella Shurr** -> All Participants: Thinking about it, I think my answer should have been yes. (We are a part of the CRDP program)

**Paul Nease** -> All Participants: Same as James. I grab the OCLC number using the CGP to download from there

**Laura Sare (Council)** -> All Participants: I don't download from CGP because we download from OCLC

**Mark Hamilton** -> All Participants: Mostly the ability to download more than 20 results, or to download all results from a search

**Scott Matheson** -> All Participants: It's easiest to have a single cataloging workflow...

**james jacobs** -> All Participants: I bet many who answered "no" are getting records via marcive

**Mary Clark** -> All Participants: Get records from Marcive or OCLC for serials

**Andrea Craley** -> All Participants: Don't download directly from CGP - I usually use CGP for some MARC clarification and then use Z39.50 and download from OCLC into our ILS for a record or two. Most of ours come from CRDP

**Mary Jo Heacock** -> All Participants: Use OCLC

**Scott Briggs** -> All Participants: We use Marcive for new releases, and OCLC for older records.

**John Devine** -> All Participants: This was a tricky poll question, as I get my cat records via the CRDP, which is from the CGP in the long run.

**David Isaak** -> All Participants: We already participate in CRDP and our consortial often already has the record in Alma's Network Zone. I usually use CGP as a discovery tool, but get the records elsewhere.

**Lisa Pritchard (Council)** -> All Participants: OCLC or CRDP

**Ping Chen** -> All Participants: How to download the records? The benefits?

**Bert Chapman** -> All Participants: Being able to search for reports by popular name. For instance, House Foreign Affairs Committee Republicans this year issued a minority report on the Chinese origins of COVID called the McCaul Report after the Texas Rep. who is that committee's ranking member.

**Asteria Ndulute** -> All Participants: key word search

**Andrea Stelljes** -> All Participants: Yes, Hennepin County Library uses Marcive

**Thomas Fischlschweiger** -> All Participants: We use Marcive and OCLC for MARC records, but we are looking at using the CGP as well.

**Rick Mikulski (Council)** -> All Participants: We do get our records through MARCIVE

**Monica Dorame** -> All Participants: We get from Marcive

**Colleen Turkal** -> All Participants: Yes, I also answered "no" but get my records via Marcive (CRDP)

**Janelle Breedveld** -> All Participants: Marcive for current releases and OCLC for copy cataloging historic publications

**Scott Matheson** -> All Participants: Yes, what Andrea said - clarify in CGP....

**Sheila Dorsey** -> All Participants: OCLC and Marcive (CRDP)

**Andrea Morrison** -> All Participants: Our basic catalog search allows limiting by online only or the entire catalog -- very useful.

**Bert Chapman** -> All Participants: Get our records via Marcive.

**William Sleeman** -> All Participants: I tend to use the OCLC number in the record and get it there but I would really like to export but it has not worked for me. Not described in the help section, why not?

**Jim Gillispie** -> All Participants: Include record results more like this.

**Sandy Himel** -> All Participants: Get records from OCLC and Marcive

**John Devine** -> All Participants: Although I sometimes find it problematic, from a patron perspective, would it be possible to get the "most relevant" results at the top.

**JoAnna McCulley** -> All Participants: we download our records from OCLC but use CGP to help find titles

**Karina Ricker** -> All Participants: Rarely need a new MARC record as our tangibles are mostly new serial issues.

**Thomas Fischlschweiger** -> All Participants: Could the CGP have variant/outdated SuDocs numbers for items? We try to keep up with Webtech but we come across some old numbers we can't always verify.

**Beth Downing** -> All Participants: Marcive and OCLC

**Elizabeth Eckert** -> All Participants: Get records from Marcive and OCLC

**Amy Ruhe** -> All Participants: Actually we really follow what Andrea described

**James Jacobs** -> All Participants: Want to be able to limit results via facets, limit to digital/physical, view expanded number of results beyond 10, search within results, save urls to searches without LONG hideous urls, See what libraries have an item (true union catalog!!)

**Asteria Ndulute** -> All Participants: MARCIVE and OCLC

**Andrea Craley** -> All Participants: @John - agree with that patron perspective

**Aimee Quinn (Council)** -> All Participants: +1 Thomas  
**Andrea Morrison** -> All Participants: Keep browse SuDoc no. We dropped it in our catalog and I miss it!  
We dropped most browse functions, and I really dislike it.  
**James Jacobs** -> All Participants: +1 Andrea  
**Jim Gillispie** -> All Participants: Include in results "most viewed or popular"  
**Aimee Quinn (Council)** -> All Participants: YES @Andrea  
**Andrea Morrison** -> All Participants: We can limit by Format, Language and Collection in our catalog,  
which I find very useful. I would like to limit by Gov. Agency.  
**James Jacobs** -> All Participants: my library decided not to include a SuDoc index because it was too  
tricky and I was evidently the only one who used it :-)  
**Jen Kirk (Council)** -> All Participants: +1 Andrea  
**Andrea Craley** -> All Participants: +1 Andrea  
**Mark Hamilton** -> All Participants: Export full results in .csv or Excel.  
**Vicki Tate (Council)** -> All Participants: I can search for item numbers (074) in my catalog, but searching  
for item numbers only works well if it is a 4-digit number and not compound number.  
**Libby McDaniel** -> All Participants: keep SuDoc browse. we don't have it either.  
**Jen Kirk (Council)** -> All Participants: Export full results in .csv or Excel.  
**Karina Ricker** -> All Participants: we also no longer have a browse sudoc. boo hoo  
**James Jacobs** -> All Participants: YES Jenny!! need export to zotero!!  
**Cindy Etkin** -> All Participants: Poll E: What types of training would you like LSCM (Library Services and  
Content Management) to provide for the CGP? (select all that apply)  
**Sarah Erikson** -> All Participants: one thing we like about worldcat.org is that the URL contains the  
search string - which means we can program searching and pulling in the results. that would be great in  
CGP.  
**James Jacobs** -> All Participants: agreed RIS and/or BibTex  
**Keven McGinn** -> All Participants: The CGP has BETTER functions than our Library Catalog!  
**Vicki Tate (Council)** -> All Participants: The poll is missing the webcast (pre-recorded) option.  
**Mark Hamilton** -> All Participants: Webcasts (pre-recorded)  
**Andrea Morrison** -> All Participants: More visual examples please of different searches -- you could  
open in a different window. The more, the better!  
**Susanne Caro** -> All Participants: the poll left off pre-recorded webcasts I'll like those too  
**Mary Jo Heacock** -> All Participants: Pre recorded is missing  
**Scott Matheson** -> All Participants: Short video demos (~38lt;2 mins) on specific tasks.  
**Aimee Quinn (Council)** -> All Participants: Pre-recorded webcasts  
**Aimee Quinn (Council)** -> All Participants: +1 Scott  
**James Jacobs** -> All Participants: +1 Scott  
**Sarah Erikson** -> All Participants: short youtube or tiktok style recordings of specific searching or  
sorting or downloading functionality  
**Scott Briggs** -> All Participants: +1 prerecorded  
**Scott Matheson** -> All Participants: +1 SARAH  
**Sarah Erikson** -> All Participants: +1 Scott  
**Jen Kirk (Council)** -> All Participants: +1 Sarah, yes this would be great to embed in LibGuides  
**Michael Maben** -> All Participants: What training materials and topics for the CGP would you like LSCM  
(Library Services and Content Management) to offer?  
**Janelle Breedveld** -> All Participants: +1 Scott  
**Margaret Sylvia** -> All Participants: I like help pages with written instructions on search options and  
examples.  
**Becki White** -> All Participants: +1 Margaret

**Jen Kirk (Council)** -> All Participants: +1 Andrea - we've used something called "Guide on the Side" that has helped with more in-depth asynchronous training

**Tabitha Carr** -> All Participants: I love short highly focused content videos!

**Jennifer Morgan (Council)** -> All Participants: Discussion Q5: What training materials and topics for the CGP would you like LSCM (Library Services and Content Management) to offer?

**Tekla Slider** -> All Participants: searching tips and tricks

**Andrea Morrison** -> All Participants: Highlight the quick guides first, then provide more detailed help! I really need better Advanced Search help.

**Mark Hamilton** -> All Participants: A webinar or webcast covering expert searching in detail

**Tekla Slider** -> All Participants: how to download records directly into catalog

**Andrea Craley** -> All Participants: +1Tekla

**Mark Hamilton** -> All Participants: + 1 Tekla

**Blaine Redemer** -> All Participants: +Mark

**Andrea Morrison** -> All Participants: Link to the explanations in your guides, like SuDocs Classification explanation on FDLP.gov

**William Sleeman** -> All Participants: +1 Tekla

**Lawana Gladney** -> All Participants: Refresh

**Tekla Slider** -> All Participants: clarification-bypass going to OCLC

**Janeen Bradley Pennell** -> All Participants: More information on how to add/process electronic resources.

**Jen Kirk (Council)** -> All Participants: @Jenny - sure thing. Best example that's not in a subscription database is here (not CGP specific): <https://my.nicheacademy.com/usulibrarytutorials/course/16585>

**Lawana Gladney** -> All Participants: Refresh training

**Scott Matheson** -> All Participants: Getting records from CGP via Z39.50 is what I think Tekla wants, maybe?

**Paul Nease** -> All Participants: Tips for showing patrons how to best use the CGP. Something patron focused

**Lawana Gladney** -> All Participants: Yes

**Tekla Slider** -> All Participants: Yes, Scott

**Valerie Glenn (Council)** -> All Participants: @Tekla are you asking about how to add records directly from the CGP instead of paying for OCLC records?

**Tekla Slider** -> All Participants: Yes Valerie

**Amy Ruhe** -> All Participants: Yes that would be helpful.

**Jennifer Morgan (Council)** -> All Participants: Would anyone like training materials on the specialized catalogs (Serial Set, Congressional Publications, Serials, Historic Shelflist, Government eBooksetc.)?

**Janelle Breedveld** -> All Participants: Historic Shelflist

**Stephen Kharfen** -> All Participants: I would like to mention our GitHub repository for obtaining CGP records: <https://github.com/usgpo/cataloging-records>

**Andrea Morrison** -> All Participants: Yes on training for the specialized catalog, esp. the Historic Shelflist!

**Lisa Pritchard (Council)** -> All Participants: Yes, Jennifer. +1Andrea

**Kenna Cathcart** -> All Participants: So, yes,

**Mark Hamilton** -> All Participants: Yes, training on specialized catalogs. I forget to look at them except NET since there is a News & Events notice for that catalog.

**Margaret Sylvia** -> All Participants: +1 Jenny. I despise video training for things that are written. Written instructions work best for me.

**Patricia A. Duplantis** -> All Participants: Revision and updates to our CGP About and Help pages. The latter will include short tutorials for basic use and is anticipated to be released by the end of

2021. Future phases of enhancements will provide more tutorials and additional tips and hints.

**Lawana Gladney** -> All Participants: Yes

**Stephen Kharfen** -> All Participants: We also posted all CGP records as of June 29, 2021 except for brief bibliographic records in .mrc and MARCXML

**Stephen Kharfen** -> All Participants: <https://github.com/usgpo/cataloging-records-all-cgp-utf8>

**Aimee Quinn (Council)** -> All Participants: I would like to see some kind of crosswalk between the specialized catalogs and the national bibliography especially for titles which continue such as monographic series which turn into serials.

**Stephen Kharfen** -> All Participants: <https://github.com/usgpo/cataloging-records-all-cgp-marcxml>

**Mark Hamilton** -> All Participants: Thank you Stephen K, I love that record availability!

**Perveen Rustomfram** -> All Participants: +1 Jenny--covers for LibGuides

**Stephen Kharfen** -> All Participants: You're very welcome. We are glad that you find them useful.

**Aimee Quinn (Council)** -> All Participants: Thank you Stephen Kharfen!

**Andrea Craley** -> All Participants: +1Jenny - Yes - good idea about bookcovers for LibGuides

**Susanne Caro** -> All Participants: +1 Aimee

**Aimee Quinn (Council)** -> All Participants: Thank you all for a fabulous presentation and discussion.

**Stephen Kharfen** -> All Participants: You're very welcome.

**Lisa Pritchard (Council)** -> All Participants: Thank you!

**Will Stringfellow (Council)** -> All Participants: Thank you all for your input!

**Stephen Kharfen** -> All Participants: Thank you very much for your great ideas and recommendations!

**Michael Maben** -> All Participants: Thank you everyone for attending today!

**Elizabeth McDonald** -> All Participants: Thank you for all the great information

**Patricia A. Duplantis** -> All Participants: Also, we always welcome suggestions for CGP enhancements requests for the current or future CGP using the Suggestion: CGP technical enhancement/MetaLib Resource; category in askGPO at: <https://ask.gpo.gov/s/contactsupport> More details of CGP and related resource enhancements will be provided via FDLP News & Events.

**Mark Hamilton** -> All Participants: Thank you for this opportunity to give feedback.

**Cindy Etkin** -> All Participants: Thanks to you all! You provided terrific, ideas and other useful feedback!

**Jen Kirk (Council)** -> All Participants: Love this discussion, I appreciate sharing experiences with colleagues and having spaces to discuss things like this!

**Lawana Gladney** -> All Participants: Thank you!

**Kenna Cathcart** -> All Participants: Thank you.

**Aimee Quinn (Council)** -> All Participants: +1 Jen!

**Janelle Breedveld** -> All Participants: This was helpful, loved that I learned some new features of the CGP today.

**Andrea Stelljes** -> All Participants: Thank you for having this conversation. Very helpful!

**Andrea Morrison** -> All Participants: Please provide 'best practices' in Help. For example, suggest searches for finding digital documents for library displays or for finding documents for various audiences, age groups, etc.

**james jacobs** -> All Participants: one last thing, it'd be awesome if GPO joined teh Folio group <https://www.folio.org>

**Susanne Caro** -> All Participants: thank you!

**Tien Triggs** -> All Participants: Thanks, and great webinar!

**Tien Triggs** -> All Participants: Session, I mean

**Libby McDaniel** -> All Participants: Thank you so much for asking for our input!

**Perveen Rustomfram** -> All Participants: Thanks for this opportunity to provide input and great ideas!

**Mary Clark** -> All Participants: thank you

**Blaine Redemer** -> All Participants: How about gaps in serial records (e.g. Budget of United States...

goes from 2010 to 2014), where is 11, 12 and 13. or is this a cataloging question? :-)

**Stephen Kharfen** -> All Participants: I will check on this. We will get back to you. Thank you very much

**Tekla Slider** -> All Participants: Great discussion and wonderful ideas -it's obvious there are people at all levels of comfort using this tool

**Blaine Redemer** -> All Participants: Thank you.

**Patricia A. Duplantis** -> All Participants: Thank you all for the great feedback. We appreciate the DLC Collection & Discovery Services Working Group for hosting this session and including us.

**Andrea Morrison** -> All Participants: I love the detailed summary holdings for serial records and use the information frequently!

**Min Shaheen** -> All Participants: Thanks.

**Aimee Quinn (Council)** -> All Participants: +1 Andrea Morrison

**Andrea Morrison** -> All Participants: Thank you, great session!

**Brent Abercrombie** -> All Participants: Thank you for a wonderful session and discussion. This was great!

**Cindy Etkin** -> All Participants: thanks everyone!

**Ella Shurr** -> All Participants: Thank you!

**Kenna Cathcart** -> All Participants: there are no gaps of the Budget of the United States
