Agenda: Some changes in name authority records (NARs) due to RDA

- Why the changes? -- FRBR, FRAD, and RDA
- How to read RDA name authority records
- Real life stories from GPO
- Changes in the authorized access points due to RDA
- Synchronizing your bibliographic file with your authority file
- Finally, this 1 hour session can only be an overview, so let us know which aspects you would like us to cover in future sessions.

What this presentation will *not* cover:

- How to catalog name authority records
- Subject authority records
- Governments and other organizations that are places (such as countries, states, cities, water districts, etc.)
- Series authority records ...
- and other authority records for works and expressions (titles ... formerly, uniform titles)

So:

Let us know what you would like us to cover in future training sessions.

Acronyms & Definitions

AACR2: Anglo-American Cataloguing Rules, 2nd edition – the previous cataloging standard

AAP: Authorized Access Point (formerly called “heading”)

Bib record: bibliographic record

CGP: Catalog of Government Publications (maintained by GPO)

ILS: Integrated Library System

LC: Library of Congress

LC NACO File: also known as the LC Name Authority File

MARC: Machine Readable Cataloging (also MARC 21)

NACO: Name Authority Cooperative – the component of the PCC for name authority records

NAR: Name Authority Record

PCC: Program for Cooperative Cataloging

RDA: Resource Description and Access – the new cataloging standard

Name Authority Records (NARs):

- Any institution may create and maintain their own local authority records
- GPO has been a PCC NACO participant since 1977
- Therefore, GPO creates and modifies records in the Library of Congress Name Authority File, or the LC NACO file (over 1,300 records in 2013!)

Consequently:

All examples will be records that exist in the LC NACO file. These records can be found in OCLC, and in various library catalogs.

U.S. GOVERNMENT PRINTING OFFICE | www.gpo.gov | www.fdiys.gov | http://www.fdlp.gov | http://bensguide.gpo.gov | http://bookstore.gpo.gov

User Tasks associated with Group 2 entities

FRAD: *Find* an entity or set of entities corresponding to stated criteria (i.e., to find either a single entity or a set of entities using an attribute or relationship of the entity as the search criteria).

RDA: *Find* information on that entity and on resources associated with the entity.

Pat Riva, 2008: *Find* entities that correspond to the search criteria, or explore bibliographic entities.

User Tasks associated with Group 2 entities

FRAD: *Identify* an entity (i.e., to confirm that the entity represented corresponds to the entity sought, to distinguish between two or more entities with similar characteristics).

RDA: *Identify*—to confirm that the entity described corresponds to the entity sought, or to distinguish between two or more entities with similar names, etc.

Pat Riva, 2008: *Identify* an entity as being the one sought, or validate the form of name to be used.

User Tasks associated with Group 2 entities

FRAD: *Contextualize* - place a person, corporate body, work, etc. in context; clarify the relationship between two or more persons, corporate bodies, works, etc.; or clarify the relationship between a person, corporate body, etc. and a name by which that person, corporate body, etc. is known.

RDA: *Clarify* the relationship between two or more such entities, or to clarify the relationship between the entity described and a name by which that entity is known.

Pat Riva, 2008: *Contextualize* - provide context, clarify relationships

User Tasks associated with Group 2 entities

FRAD: *Justify* - document the authority record creator's reason for choosing the name or form of name on which a controlled access point is based.

RDA: *Understand* why a particular name or form of name has been chosen as the preferred name for the entity.
(modified)

Pat Riva, 2008: *Justify* – document the reason for choosing the name or form of name used.

Prominent RDA Features:

Instructions describe “attributes” (i.e., characteristics) and relationships of “entities,” such as Group 2 entities: persons, corporate bodies, and families).

These attributes become data elements in RDA.

Real life stories from GPO

The next three examples focus on GPO’s work in its own catalog, the CGP (Catalog of Government Publications). This, after all, is what most of you do—assist your users with your own catalog and collection. In the following examples, the actions “delete” and “load” refer to GPO’s ILS (the CGP). Bib records refer to those in the CGP.

What's wrong with a split file?

Model: Entity → Names/Access Points → Authorized Access Point (usually 1)

Ideal: U.S. Department of Transportation → United States. Department of Transportation, United States. Dept. of Transportation, DOT, Departamento de Transporte, etc. → United States. Department of Transportation

Split File: U.S. Department of Transportation → United States. Department of Transportation, United States. Dept. of Transportation, DOT, Departamento de Transporte, etc. → United States. Department of Transportation PLUS United States. Dept. of Transportation

Result: User must look in 2 places for the same entity

How can you synchronize your bibliographic file with your authority file? (to ensure that your “headings” are uniform and consistent)

- Your ILS:
 - Updating function (links bib AAPs to authority)
 - Global changes
- Authority control vendor
- Programs may be available, such as (or similar to) the one used on LC's or OCLC's database.
