Some Leading Census Data Sources

- Hard copy, CD/DVD
 - Census Bureau has made a conscious decision to slowly move away from these environments
- Census Bureau on the web
 - Main website www.census.gov
 - American FactFinder www.factfinder2.census.gov
 - Data Ferrett www.dataferrett.census.gov
 - FTP www2.census.gov

5

Assumptions About FTP

- Users have pre-existing expert knowledge of Census products
 - If not, you can be here but work with caution
- Users are comfortable working with large sets of data
 - Many sets have several thousand rows of data
- Users have the necessary tools
 - SAS or similar statistical software
 - Microsoft Office Suite 2007 or equivalent

6

FTP Limitations

- Text based instructions may be limited and technical
- There are very few tutorials
- Not everything is clearly labeled
 - lots of holdover files from era when names were limited to 8 characters
- Hard to walk you through the process in an ‘over the phone’ setting

7

So Why Use FTP?

- Need an electronic file showing population by Census Block in
 - Tarrant County, TX
 - Orange County, CA
 - Oklahoma County, OK
 - “Your selection is too large to view this product, please remove some items from ‘My Selections’ and try again.”
- Need electronic file with population characteristics from 1980 or 1990 Census
 - Can get *.pdf via archives, but exportable results not available via AFF2

8

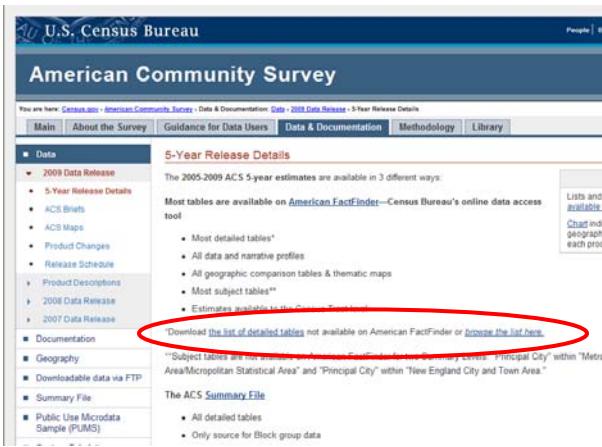

Want Another Reason?

Not every ACS table is available on American FactFinder, but they are available in FTP

- 7 examples out of 295 such tables
 - Means of Transportation to Work by Age
 - Sex by Age by Citizenship Status (Hispanic or Latino)
 - Place of Birth By Marital Status in the United States
 - Grandchildren Under 18 Years Living With A Grandparent Householder By Age Of Child
 - Median Age at First Marriage by Race
 - Women 15 To 50 Years Who Had A Birth In The Past 12 Months By Marital Status And Poverty Status In The Past 12 Months
 - Mortgage Status by Age of Householder
 - Full list available at
http://www.census.gov/acs/www/data_documentation/2009_5yr_data_L

How to Find The List

The screenshot shows the U.S. Census Bureau's website for the American Community Survey. The main navigation bar includes links for Main, About the Survey, Guidance for Data Users, Data & Documentation, Methodology, and Library. The left sidebar has a 'Data' section with links for 2009 Data Release, 5-Year Release Details, ACS Briefs, ACS Maps, Product Changes, Release Schedule, Product Descriptions, 2008 Data Release, 2007 Data Release, Documentation, Geography, Downloadable data via FTP, Summary File, and Public Use Microdata Sample (PUMS). The '5-Year Release Details' page is displayed, featuring a list of detailed tables available on American FactFinder. A red oval highlights the link 'Download the list of detailed tables not available on American FactFinder or browse the list here.'

- Using link on previous slide, you get this page
- Click 'list of detailed tables' to see what's not on ACS

README File for 2005-2009 American Community Survey (ACS)

5-Year Data Products Delivered via FTP

FTP Site URL: http://www2.census.gov/acs2009_5yr/prod

Note to Users of the 2005-2009 ACS 5-YEAR FTP Site

Some of these files on this site contain more than 65,000 rows and may not be loaded completely into some spreadsheets. Therefore, we recommend user open with a text editor such as WordPad.

FTP Site contains all 2005-2009 ACS 5-year data products including all detailed tables that are not available on American FactFinder (AFF). For the list of detailed tables not on AFF, please visit the ACS website, URL: http://www.census.gov/acs/www/data_documentation/2009_5yr_data/.

Tips For More Information

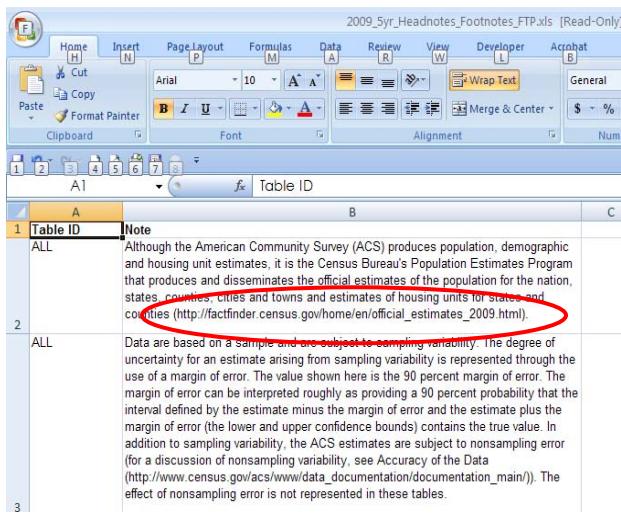

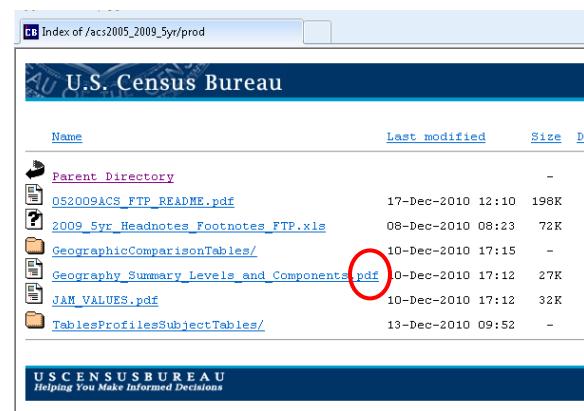

Table ID	Note
ALL	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties (http://factfinder.census.gov/home/en/official_estimates_2009.html).
ALL	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data (http://www.census.gov/acs/www/data_documentation/documentation_main/)). The effect of nonsampling error is not represented in these tables.

A Key to Translate Values

ACS 5-Year Jam Values

Some data values represent unique situations where either: a) the information to be conveyed is an explanation for the absence of data, represented by a symbol in the data display, such as "(X)", or b) the information to be conveyed is an open-ended distribution, such as 115 or greater, represented by 116 or 115+.

Jam Value	Display Value	Description
-999999999	N	Indicates that an estimate or its margin of error cannot be provided because the number of sample cases is too small for the given geographic area.
-888888888	(X)	Indicates that the estimate is not applicable or not available.
-777777777	(Z)	Estimate is not available for an undefined reason.
-666666666	-	Indicates that no sample observations were available to compute an estimate, or a ratio estimate cannot be computed because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

Finding Your Way

An Example Using 2010 Census Redistricting Data

36

Notes About Redistricting FTP

- Census assumes you either have SAS or Access in order to view this data
- It's up to you to figure out how to view this data if you don't have those specific tools
- **Plan ahead!**
 - It took the better part of a morning to download necessary files, import into Access, and begin working with the data
 - That was using a high speed internet connection

37

Pick a Data Set From FTP Site

- Let's look at the Census 2010 dataset

Pennsylvania/	09-Mar-2011 14:03	-
Rhode Island/	23-Mar-2011 14:03	-

A 'File Download' dialog box is overlaid on the list, asking 'Do you want to open or save this file?'. It shows the file 'PL2010_Access.accdb' with details: Name: PL2010_Access.accdb, Type: Microsoft Office Access 2007 Database, 584KB, From: www2.census.gov. There are 'Open', 'Save', and 'Cancel' buttons, and a checked checkbox for 'Always ask before opening this type of file'. Below the dialog, the file list continues with 'Pennsylvania/' and 'Rhode Island/'.
