## Immigration Data and Statistics

Since the passage of the Homeland Security Act of 2002, the Office of Immigration Statistics has responsibility to carry out two statutory requirements: 1) to collect and disseminate to Congress and the public data and information useful in evaluating the social, economic, environmental, and demographic impact of immigration laws; and 2) to establish standards of reliability and validity for immigration statistics collected by the Department's operational Components.

The following are key datasets and resources published by the Office of Immigration Statistics.
