

# Wrestling with Aggregators: Republished Data Puts Small Towns on the Global Map

Carl P. Olson • Librarian for Government Information • Albert S. Cook Library, Towson University

For the first time in history, a majority of the world's 7.7 billion people live in cities. Equity among them looms larger as a global issue. Decentralized information sources create a "zoology" of enterprises, state agencies & non-profits repurposing public data for an urban global age.

## Enterprise Aggregators (Then & Now)

STAT-USA (1996-2010) was for 14 years the Commerce Department's self-funded enterprise for statistics.

National Business & Industry Data Series;

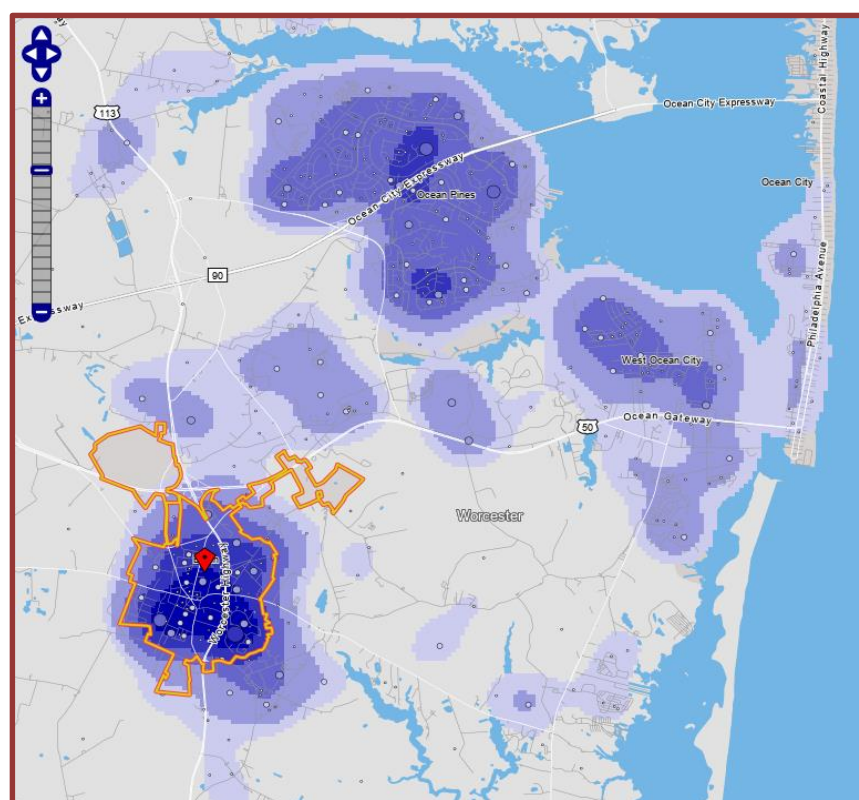

World & Inter-national Trade Data Series.

Its success spawned many imitators. UCF Libraries' Stat-USA LibGuide preserves access to its sources: <http://guides.ucf.edu/statusa/home>

Local Employment Dynamics Partnership of the U.S. Census Bureau (USCB) and 49 states creates interactive tools for labor market data:

OnTheMap - <https://onthemap.ces.census.gov/> maps American jobs down to the smallest towns.

Distance-Direction Home-to-Job Analysis for Berlin, MD

Jobs within a Four-Mile Buffer Zone around Berlin, MD

## State Agency Data Centers (CB Partners)

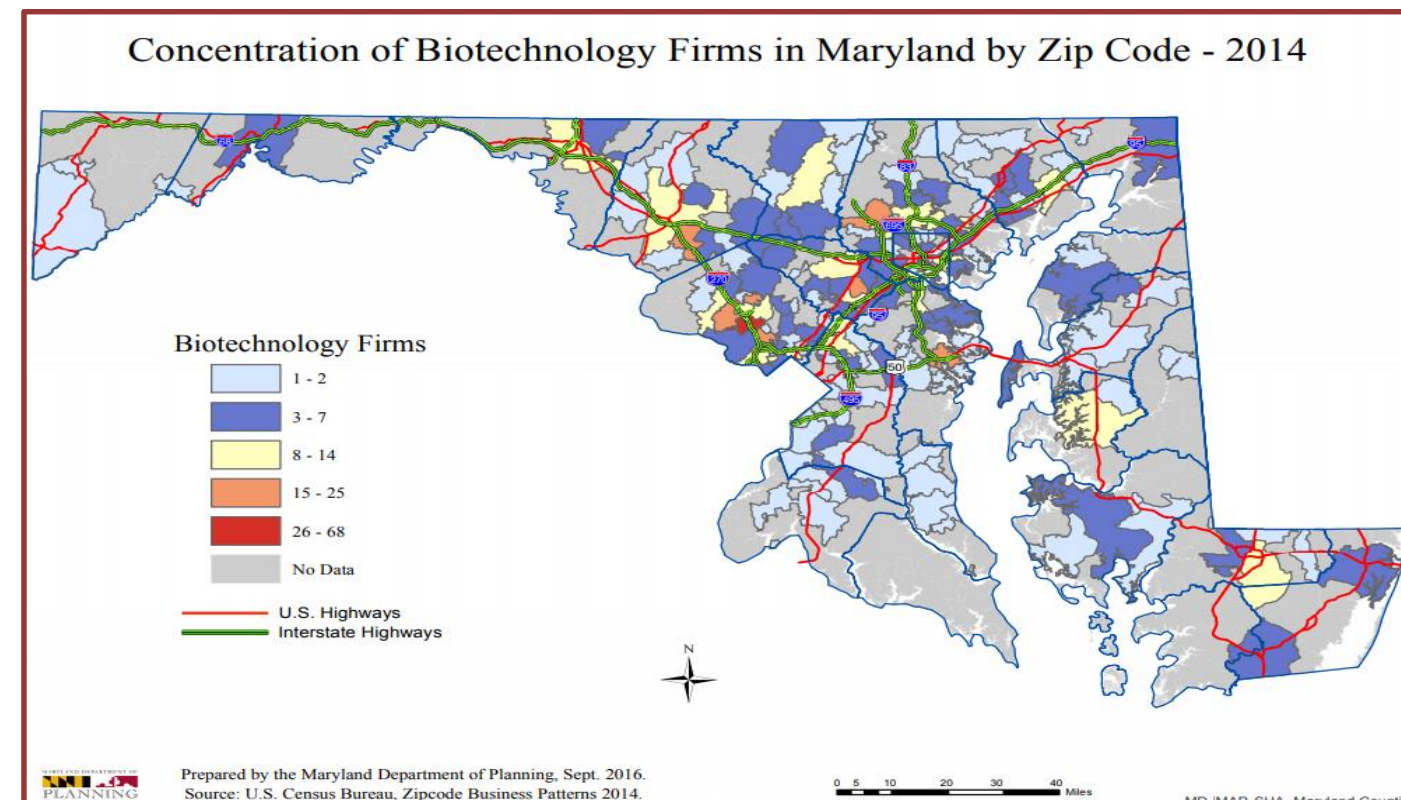

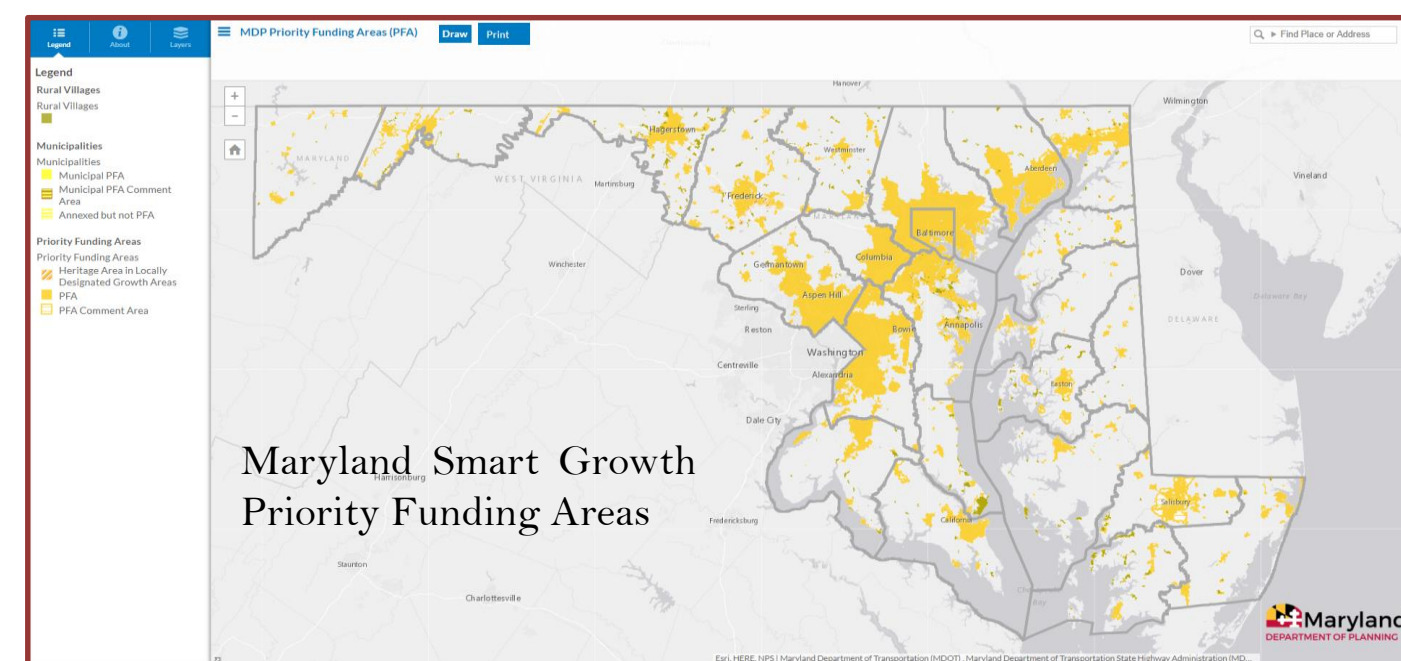

The State Data Center (SDC) Program is the USCB's long-running & successful partnership: <https://www.census.gov/about/partners/sdc.html>

The State Data Center Clearinghouse gathers products & projects from SDC partners: <https://sdcclearinghouse.com/>

- Estimates
- Projections;
- Maps/GIS;
- Economic Census
- Agriculture Census
- Custom Reports.

Census 2010 Trends and Statistics Segregation Measures for states and metro areas (14 Dec 2010)

Charts & Trends: For States, Metro Areas, and Counties. Census and Trend Data going back to 2000, 1990, 1980, and sometimes even further, on a growing list of topics, including population growth, population by race, age structure, family structure, and income.

MAPS: Many of the most important social trends affecting America have a strongly regional flavor. Figure out where you fit in with demographic maps showing where the elderly predominate (think the Great Plains), where the nuclear family is (and isn't) the norm, and how "diversity" breaks down regionally.

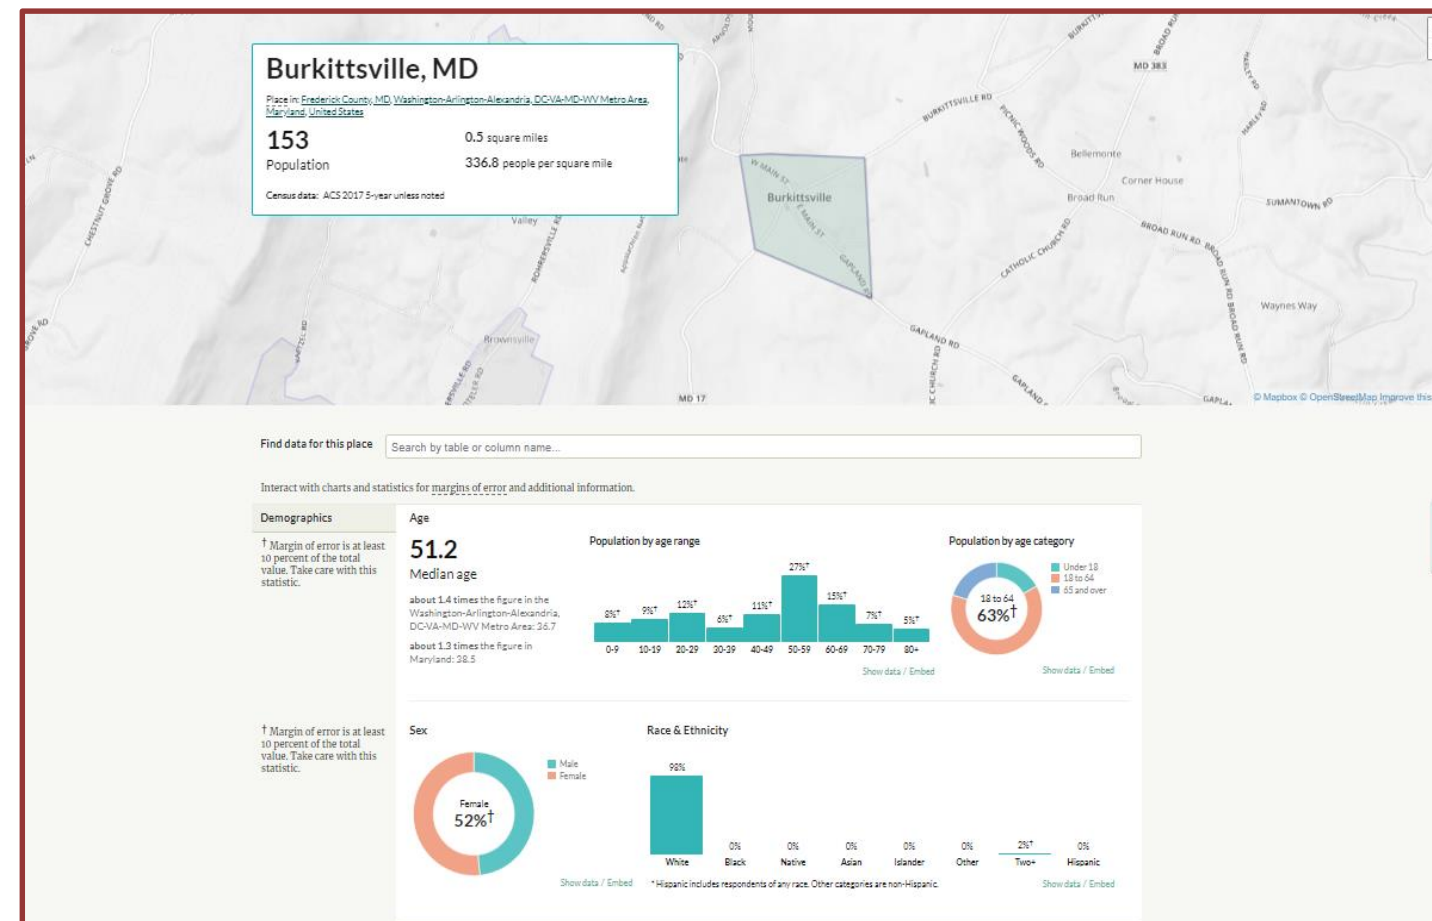

RANKINGS: State and county-level rankings by population, growth, race, educational attainment, language, gender, and more. Rankings by metropolitan area now available.

SEGREGATION: Segregation Exposure and Dissimilarity Measures for 1246 individual US cities with population exceeding 25,000 and for all metropolitan areas, based on angle and multiple race populations as identified in Census 2000.
