Welcome [my sites] [1 online] [print]

Welcome to the FDL Training Assistance Center!

Thank you for visiting the Federal Depository Library Program (FDLP) Training Assistance Center! This site is an FDLP collaborative effort to share government information training resources. It provides training materials, awareness of training opportunities, and a subject expert locator - all from a centralized location.

At its Fall 2012 meeting the Depository Library Council (DLC) recommended that GPO develop a platform that would allow the depository community to locate and share government information-related education and training resources already available from both GPO and depository libraries.

Subsequent meetings of the DLC Working Group and Library Services and Content Management (LSCM) Outreach and Support staff resulted in the identification of three major elements for the training resources platform:

- Calendar of training events;
- Subject Matter Expert (SME) Locator; and
- Training Resource Repository.

The Training Assistance Center provides these three components, addressing a long-standing need within the community that was reiterated in responses to the FDLP Forecast Study questionnaires. Education is a major priority and plays a significant role in the future of the FDLP.

We hope you find this tool valuable as you prepare educational and training sessions or seek continuing education opportunities for you and your colleagues. We also encourage you to help expand the available resources by contributing materials you develop. Or, use the calendar to advertise your programs and training events.

This is the prototype phase of the Training Assistance Center and GPO is very interested in your feedback.
