Addressing Community Concerns

- ✓ Seek trusted repository certification for FDsys
- ✓ Need for inventory and bibliographic control of the National Collection of U.S. Government Information
- ✓ Maintain geographically distributed tangible copies
- ✓ Define “requisite number of tangible copies” to ensure access and preservation

✓ = working on

New Regional Discard Policy

“Government Publications Authorized for Discard by Regional Depository Libraries”

Authorized when the publication:

- 1) Has been retained by the regional in tangible form for a period of seven years from the date of receipt, processing, or shipping list date; and,
- 2) Is available on GPO’s Federal Digital System in a format that meets the standards of the Superintendent of Documents as authentic with the digital signature of the Superintendent of Documents.

AND...

4

New Regional Discard Policy

- 3) A minimum of four tangible copies of the publication exist in the FDLP distributed geographically.

“The third stipulation will enable the Program to accomplish its goals while also providing the necessary access to materials.”

Gregg Harper, Chairman
Joint Committee on Printing

Policy Requires Regionals

- To inform GPO of their intent to discard tangible depository materials
- To receive advance approval to discard from the Superintendent of Documents
- To offer the discarded publications to the selectives they serve and then to other depository libraries nationwide

The Four Copies – Access vs. Preservation Copies

<h3>Access Copies</h3> <ul style="list-style-type: none"> • Presumes use • May circulate • May share through ILL • Use means wear, tear, and potential loss 	<h3>Preservation Copies</h3> <ul style="list-style-type: none"> • Cannot accept wear, tear, or potential loss • Presume dark archive • Source of tangible facsimiles • Source for new digital copies • Best copy available • Copies of last resort

Preservation Copy of Record

The preservation copy of record for **tangible publications** is the complete version set aside to protect its informational content and intrinsic value from decay or destruction. The copy of record may be nondestructively digitized to create a digital surrogate to function as the use copy. Intrinsic value is the worth of an item beyond the information content; it includes a combination of factors including historic value and provenance.

The preservation copy of record for **digital content** is the preservation master file stored in a trustworthy repository. Derivatives of the preservation master copy are made available for access. The digital copy of record should be produced to specifications that will allow the creation of a printed facsimile version, should one be needed.

Why the GPO Regions?

- There are ten regions
- Response from the Discard Intent Survey of 11/2014
- More regions in the NE and Mid-Atlantic
- Regionals covering multiple states are intact
- GPO working infrastructure that's in place

The Processes

- Validate the Discard Intent Survey submitted in 11/2014
 - ◆ Inform GPO of validation or changes
- Submit request to discard to GPO
- Receive GPO response within 30 days. Do not take action until you hear from GPO
- Offer titles to selectives you serve once discard permission is granted. Allow 2 weeks for responses
- Post list to GPO's Needs & Offers list for at least 2 weeks http://www.access.gpo.gov/su_docs/fdlp/tools/needs_of/index.html

Best Practices

- Regionals – review discard intent with selectives
 - ◆ If selectives are ok with this, this streamlines the process once permission from GPO is received as selectives will already have had an opportunity to speak up.
- Work with selectives to devise a state-wide collection development plan that includes discard strategies
- Provide GPO a copy (digital or paper) of or a link to your collection development plan
- Share your plan with other regionals
