## Overview

WorldShare Collection Manager (WCM) is a powerful tool provided free of charge to OCLC subscribers to set OCLC holdings and procure high-quality records for print and electronic resources. Libraries can receive the same OCLC records previously provided by MARCIVE.

OCLC files include electronic and non-electronic. New and updated records are included as available and delivered in separate files.

This poster will illustrate the steps to upload online GPO records into library catalogs: Collections Available, Record Delivery Configuration, Titles in WCM, the Download Interface, and Records in the online catalog.

*OSU is a FOLIO library using EBSCO Discovery Services (EDS)*
