

Data.CDC.gov, CDC TV, CDC Newsroom

Data.CDC.gov

<https://data.cdc.gov/>

If anyone at CDC publishes any data other than minor, incidental data it will appear here in Excel format –

The screenshot shows the Data.CDC.gov website interface. At the top, there is a navigation bar with links for Home, Data Catalog, Developers, and Video Guides. A search bar is located on the right side of the navigation bar. Below the navigation bar is a large image of a traffic jam on a highway. Underneath the image, the heading "Motor Vehicle Data" is displayed, followed by a brief description: "State-based motor vehicle data are available for each state and the District of Columbia. They include national and state data on motor vehicle deaths, restraint use, drunk driving and alcohol-involved crash deaths. State data are also available grouped by HHS Region." Below this description is a grid of eight data categories: NCHS, INJURY & VIOLENCE, NATIONAL NOTIFIABLE DISEASES SURVEILLANCE SYSTEM, VACCINATION, SMOKING & TOBACCO USE, PREGNANCY & VACCINATION, WEB METRICS, and BROWSE ALL. A "Sign In" button is visible in the top right corner of the website.

Since it ties in with a webinar about CDC data that I gave on March 22, here is the Excel version of the “500 Cities” data that we looked at; this is “View Data” with a search for “Binge drinking”. This is the basic data before I use Excel’s tools to change anything –

If you have even basic Excel skills you won't have a problem working with this data, and if you have good Excel skills, working with data in Data.Excel.gov is enjoyable.

CDC.TV

21 Videos

Now let's open one of these topics and choose a video; this is from
"Lifestyle" –

The Obesity Epidemic

This video explains the many factors that have contributed to the obesity epidemic, and showcases several community initiatives taking place to prevent and reduce obesity. Obesity is a national epidemic and a major contributor to some of the leading causes of death in the U.S., including heart disease, stroke, diabetes and some types of cancer. We need to change our communities into places that strongly support healthy eating and active living.

CDC Newsroom

Language: English (US)

Mosquito Bites: Everyone is at Risk!
The most effective way to avoid getting sick from viruses spread by mosquitoes is to prevent mosquito bites.

CDC's Tips From Former Smokers: Anti-smoking campaign launches seventh year
CDC's [Tips From Former Smokers campaign](#) resumes for 25 weeks on April 23, 2018. The 15- and 30-second ads will air nationally on television, online, and in print advertisements.

CDC Telebriefing – New Vital Signs Report – Vector Borne Diseases
The number of illnesses from tick, mosquito, and flea bites has more than tripled in the US, with over 640,000 cases reported from 2004 through 2016. Widespread and difficult to control, diseases from mosquitoes and ticks are major causes of illness and sometimes death.
