Access and Utilization of Selected Preventive Health Services Among Adolescents Aged 10–17

Lindsey I. Black, M.P.H.; Colleen N. Nugent, Ph.D.; and Anjel Vahratian, Ph.D.

Key findings

Data from the National Health Interview Survey

- The percentages of adolescents aged 10–17 who did not have a usual place for preventive care, did not receive a well-child checkup in the past 12 months, or did not have a dental visit in the past 12 months decreased from 2008 to 2014.
- In 2014, 2% of adolescents aged 10–17 did not have a usual place for preventive care, 21% did not receive a well-child checkup, and 12% did not have a dental visit in the past 12 months.
- In 2014, the percentages of adolescents not having a usual place for preventive care, not receiving a well-child checkup, and not having a dental visit were higher for those aged 16–17 compared with those in younger age groups. These

Adolescence is a critical period for health promotion, disease prevention, and the development of healthy habits (1). Regular preventive health care visits during this period are recommended to promote health and quality of life (2). This report examines recent trends and demographic differences in the percentages of adolescents with a usual place for preventive care, those who had a well-child checkup in the past 12 months, and those who had a dental visit in the past 12 months.

Keywords: teens • wellness • medical care • National Health Interview Survey

How has adolescents' preventive health care service utilization changed over time in the United States?

From 2008 to 2014, the percentages of adolescents aged 10–17 who did not have a usual place for preventive care, did not receive a well-child checkup in the past 12 months, or did not visit the dentist in the past 12 months decreased (Figure 1). For all years, the percentage with no well-child checkup was

Figure 1. Percentage of adolescents aged 10–17 who did not have a usual place for preventive care, did not receive a well-child checkup, or did not have a dental visit, by year: United States, 2008–2014.

The image shows the cover of a report titled "INFOCUS" with the subtitle "Child Protection: Law Enforcement". The cover features a photograph of Caren Harp, Administrator, and the date "June 2020". The report is published by the Office of Juvenile Justice and Delinquency Prevention. The cover text includes:

Child Protection: Law Enforcement
The safety and well-being of children are central to the Office of Juvenile Justice and Delinquency Prevention's (OJJDP's) mission. OJJDP enhances the efforts of federal, state, local, and tribal law enforcement and prosecutorial agencies who investigate cases of missing, abducted, and exploited children; ensure that victims receive trauma-informed care; and bring offenders to justice.

Programs
National Center for Missing & Exploited Children
The center is an information clearinghouse and resource on missing and exploited children. It operates a 24-hour missing children's hotline, a CyberTipline that processes reports of online child sexual exploitation, and a Child Victim Identification Program to help authorities determine the identities of children whose images appear in pornography. The center's **Team Adam** provides rapid onsite assistance to law enforcement agencies and families in critical cases. During fiscal year 2019, the center helped to resolve cases involving 27,577 children who were reported missing.
▶ **Funding for fiscal years 2017–2019: \$90.2 million**

AMBER Alert Program
AMBER Alert systems in each state issue alerts to the public—on highway signs, radio, television, wireless devices, and the Internet—when law enforcement determines that a child has been abducted and is in imminent danger. OJJDP offers training to enhance the state systems and expand AMBER Alert in Indian country. The Office also hosts an annual AMBER Alert symposium. By the end of 2019, a total of 977 children had been successfully recovered through the AMBER Alert program.
▶ **Funding for fiscal years 2017–2019: \$10.2 million**

Internet Crimes Against Children Program

Funding
Between fiscal years 2017 and 2019, OJJDP awarded nearly \$195 million to help law enforcement agencies protect children and youth from harm.
▶ **Fiscal Year 2019—\$74 million**
▶ **Fiscal Year 2018—\$62.8 million**
▶ **Fiscal Year 2017—\$58 million**

From the Field
Each year, the Internet Crimes Against Children task forces lead a nationwide effort called Operation Broken Heart.
The operation targets suspects who produce, distribute, receive, and possess child pornography; engage children online for sexual purposes; participate in the sex trafficking of children; and travel to other states or countries to sexually abuse children.
During Operation Broken Heart in 2019, the task forces investigated more than 18,500 reports of technology-facilitated crimes against children, resulting in the arrest of nearly 1,700 suspected online child sex offenders.
Task force members identified 308 offenders who either produced child pornography or committed child

Sources of Braille Children's Books and Magazines

Encouraging children to read for pleasure, and thereby improving their skills is a challenge for parents and teachers whether the medium is print or braille. Of course, providing reading material that is interesting to the child is an excellent incentive.

Here is a list of sources for borrowing or purchasing braille and print/braille children's books and magazines in the United States. Please contact individual organizations for detailed information on products and/or prices.

A Brief History of Children Sent Through the Mail

When the Post Office's Parcel Post officially began on January 1, 1913, the new service suddenly allowed millions of Americans great access to all kinds of goods and services. But almost immediately, it had some unintended consequences as some parents tried to send their children through the mail.

Just a few weeks after Parcel Post began, an Ohio couple named Jesse and Mathilda Beagle "mailed" their 8-month-old son James to his grandmother, who lived just a few miles away in Batavia. According to Lynch, Baby James was just shy of the 11-pound weight limit for packages sent via Parcel Post, and his "delivery" cost his parents only 15 cents in postage (although they did insure him for \$50).
