**Title:**  
Embedded Media: Failed Test or the Future of Military/Media Relations?

**Descriptors:**  
\*MILITARY FORCES(UNITED STATES), \*PUBLIC RELATIONS, \*MASS MEDIA, MILITARY OPERATIONS, MILITARY HISTORY, IRAQ, NATIONAL SECURITY, UNCONVENTIONAL WARFARE, VIETNAM, PANAMA, GRENADA, PERSIAN GULF WAR.

**Abstract:**  
Since Vietnam the United States military has had a tenuous relationship with the American Media. Although both institutions serve to protect the constitution a palatable distrust has defined the relationship; a distrust that seems to reach its apex when the country is at war. On one hand the military has viewed the media as intruding on its operational jurisdiction willing and desiring to report on any negative events resulting from an operation. Concurrently the media has viewed the military as a closed society accountable to the American people yet not open to scrutiny by the same people it has sworn to protect. This pervasive distrust was evident during Vietnam Grenada and Panama and reached its peak during Desert Storm. After Desert Storm a series of dynamics served to relieve some of the tension between the military and the American media and set the stage for the advent of the Embedded Media Program experienced in Operation Iraqi Freedom. This student paper will address the historical relationship between the United States military and the American Media analyze where that relationship stands presently and propose a course for the future.

## Local Security Domains Increase Flexibility And Security

*"Delegating domains works a lot like delegating tasks at work. A manager may break up a large project into smaller tasks and delegate responsibility for each of these tasks to different employees."*[1]
- [DoD Security Best Practices for Computer Architectures](#)

The typical government or large corporation approach to **computer** security is to establish a central organization to set standards and practices. This has the advantage of uniformity, but the central office is often far away from and out of touch with, both the technologies employed by and the work that is being done by the employees. The results are often standards and regulations that are out of date and authoritarian in nature. One of the greatest benefits a centralized security office can provide are Security Best Practices that apply to current **computer** architectures and balance a reasonable application of security against the time and cost to provide same.
- [NSWC DL AIS Security Domains White Paper](#)

Security Best Practices for various **computer** architectures such as the [Part II Accreditation Request forms](#) are a start at providing reasonable security for a **computer** system, or group of **computer** systems. But one size does not fit all. Certain systems, due to the nature of their information and mission would require for more stringent precautions. Other systems, such as throw-away prototypes with no sensitive information and no mission, require only enough security to reduce the probability they could be taken over and used to attack other **computer** systems.

## Special Tactics Training Division

The Special Tactics Training Division conducts advanced Law Enforcement training for Department of Defense personnel. STTD is responsible for conducting five programs and supporting one. These courses are designed to meet the diverse training needs of advanced law enforcement functions.

### Special Reaction Team

[SRT Phase I](#) Course / [SRT Phase II](#) (Marksman/Observer) Course

The Special Reaction Team Phase I and Phase II (Marksman/Observer) courses provide training for those personnel responsible for performing Special Reaction Team duties and responsibilities. The Special Reaction Team provides commanders with an enhanced response force capable of responding to and resolving special threat situations (terrorist incidents, barricaded incidents (with and without hostages), drug raids, high risk warrant apprehensions. These courses are designed to meet DOD directives and service regulatory requirements (Army, Marines, and Air Force) for **Antiterrorism** phase II response force requirements. The SRT phase I course is designed for entry teams with an emphasis on various building clearing schemes of maneuver and advanced marksmanship. The SRT phase II course trains marksman/observer teams in tough and realistic intelligence gathering and special shooting situation practical exercises.

High quality relevancy

### Relevancy and search

- This paper will discuss what **relevancy** is and the different factors that go into measuring how well a set of results answers or addresses the intent of a given query.

23.Jan.2006

Registration pages:SBP Best Practices:Relevancy and search

### Demystifying relevance and ranking

- The ability of a search system to correctly identify and score relevant documents with respect to a given query is paramount to its usefulness.
- **Relevancy** is a function of recall and precision, and an effective search system balances these to maximum effect.
- Read this whitepaper to learn about **relevancy** and why it is important.

21.Feb.2006

Registration pages:SBP Demystifying Search:Demystifying relevance and ranking

### Applying business rules to search relevance

- Relevance models determine the ordering of search results, but such models need not only be based on mathematical IR (information retrieval) methods - they can also incorporate the business logic at hand, to organize the answers in a way that is commercially or organizationally optimal.

23.Jan.2006

Registration pages:SBP Best Practices: Applying business rules to search relevance

### Relevance or Relevancy ranking

- **Relevancy** is the measure of how well the indexed page answers the question.
- Only the searcher can actually define how relevant a document is, in relation to their query; there is no way to automate it.
- When there are many query matches, the search engine must rank the results by

### Who We Are

The Defense Technical Information Center (DTIC®) is **THE premier provider of DoD technical information**. DTIC serves as a vital link in the transfer of information among DoD personnel, DoD contractors and potential contractors and other U.S. Government agency personnel and their contractors. DTIC is a DoD Field Activity under the Under Secretary of Defense for Acquisition, Technology and Logistics, reporting to the [Director, Defense Research & Engineering \(DDR&E\)](#).

### Why We Do What We Do

- Provide direct information support to the warfighter.
- Leverage the multi billion dollar investment in DoD scientific and technical research.
- Prevent unnecessary or redundant research from being performed at taxpayer expense.

**Abstract:**

Media frames are vital to peoples' understanding of issues and events, but this study's findings highlight the internal frames, or primary frameworks, in shaping public opinion. A rally 'round the flag effect did occur at the out-  
ing War which caused Republicans, Democrats and Independents to support the war. Each party's affiliation and views

## 01--Aviation Technology

01	Aerodynamics	Flight characteristics and problems of full-scale or model aircraft and their components as they are affected by the dynamics of air; Flight testing and wind tunnel testing. Includes theoretical and experimental aerodynamics as applied to missiles, See <a href="#">16/02/01</a> , Guided Missile Dynamics, Configurations and Control Surfaces. For the behavior of spacecraft in air, see <a href="#">22/03</a> , Spacecraft Trajectories and Reentry. For the aerodynamics of ground structures, see <a href="#">13/13</a> , Structural Engineering and Building Technology
02	Military Aircraft Operations	Military aircraft operations such as takeoff Operations and landing, air traffic, all weather and night flight, taxiing, approach, and inflight refueling; Flight safety; Ground safety; Aviation accident studies; Aircraft simulators and training devices. For missile operations, see <a href="#">Field 16</a> , Guided Missile Technology. For spacecraft operations, See <a href="#">Field 22</a> , Space Technology. For navigation and air traffic control, see <a href="#">17/07/03</a> , Air Navigation and Guidance.
03	Aircraft	Design, production, and maintenance of aircraft, aircraft components, and aircraft equipment; Structural studies of complete aircraft components such as airframes, bodies, and wings. Airworthiness; Crashworthiness; Aircraft damage assessment and vulnerability studies; effects of gunfire and blast on aircraft and flight equipment. For civilian aircraft, See <a href="#">01/03/09</a> , Civilian Aircraft. For specific types of aircraft, See subgroups <a href="#">01/03/01</a> - <a href="#">01/03/12</a> . See also <a href="#">Field 16</a> , Guided Missile Technology and <a href="#">Field 22</a> , Space Technology.
03/01	Helicopters	Includes attack helicopters. For civilian helicopters, See <a href="#">01/03/09</a> , Civilian Aircraft.

**CORPORATE AUTHOR:** NAVAL POSTGRADUATE SCHOOL MONTEREY CA

**TITLE:** North Pacific - North American Circulation and Precipitation Anomalies Associated With the Madden-Julian Oscillation

**DESCRIPTIVE NOTE:** MAster's thesis

**PERSONAL AUTHORS:** Stepanek, Adam J.

**DESCRIPTORS:** \*ANOMALIES, \*FORECASTING, \*CLIMATOLOGY, \*OSCILLATION, \*PRECIPITATION, \*NORTH PACIFIC OCEAN, \*SEASONS, \*NORTH AMERICA, IMPACT, THESES, RESPONSE, DATA ACQUISITION SUPPLEMENTARYNOTE: The original document contains color images.

**IDENTIFIERS:** \*EL NINO, \*EL NINA, MJO(MADDEN-JULIAN OSCILLATION) LIMITATIONCODE: 01 00 00

**ABSTRACT:** The Madden-Julian Oscillation (MJO) has been associated with extreme precipitation events in western North America. However, the mechanisms for, and predictability of these associations are not clear. We have examined the influence of the MJO on North Pacific - North America (NPNA) circulation and precipitation anomalies. We constructed composites of MJO events determined from the Wheeler RMM1/RMM2 index of MJO activity. Our analyses were based on NCEP reanalysis data. We focused our investigations on the impacts on NPNA circulation and precipitation of: (1) the location and amplitude of the MJO; (2) the season of MJO occurrence; and (3) concurrent El Niño (EN) or La Niña (LN) events. We found that the NPNA response to MJO activity is sensitive to the location of both the convective and subsidence components of the MJO, the season of MJO occurrence, and the existence of concurrent EN or LN events. EN or LN events affect the extratropical response to the MJO by altering the equatorial Rossby-Kelvin wave response to the MJO. This affects the anomalous extratropical wave trains initiated by the MJO, and alters the resulting NPNA precipitation anomalies. Our results provide a foundation for improving extended range forecasts of NPNA circulation and precipitation.
