The FDLP Desktop series is a centralized resource for the Federal Depository Library Program (FDLP), which disseminates U.S. Government information to the American public through libraries across the nation. Stay up-to-date with the latest innovations and progress of the Program and utilize various tools in order to enhance public services.

Libraries, log in with your institution's number and internal password to access depository-only content (e.g., order promotional materials).

FDLP Handbook

The Federal Depository Library Handbook (FDL Handbook) contains instructions and manuals that provides legal requirements, program requirements, and guidance for depository operations. Each chapter also includes best practices, tips, and resources for library administrators.

The Federal depository community worked to consolidate and update the instructions to Depository Libraries and the Federal Depository Library Manual (and Supplement), into the FDL Handbook. With the publication of the FDL Handbook, the instructions and Manual are superseded.

The FDL Handbook is updated as necessary based on changes in the Program and community input.
