

MARCIVE, INC. OFFERS A HOST OF SERVICES TO MAKE YOUR COLLECTIONS MORE DISCOVERABLE AND ACCESSIBLE!

As a coordinator of a federal depository library collection, you want your users to find the wealth of information in government documents. What are your options?

Ongoing GPO Database Service. This is our standard service that provides monthly files of MARC records that match your GPO item number profile and tailored to the needs of your ILS or library platform. You can also select by SuDoc Stem.

Documents Without Shelves. All records catalog by GPO that contain PURLS are output on a monthly basis, but you can tell us which agencies you don't want. A specialized profile for law libraries is also available.

Shipping List Service. While you may not be getting as many tangible documents as in the past, we can help you process them with brief-level MARC records for not yet cataloged documents, as well as barcode labels and SuDoc number labels. Ask for samples!

Cataloging Record Distribution Program (CRDP). This GPO initiative is entering its tenth year, with 40 slots for October 2020-September 2021. It includes the monthly output of profiled MARC records, holdings records for OCLC, and many other options. Best of all, it's **FREE** to any depository library!

MARCIVE offers ways to make other collections (including electronic resources) more findable include: data remediation, which can include authorities processing with free RDA conversion, MARC record enrichment (Tables of Contents, Summaries, Fiction/Biography data), Reading Notes Enrichment (Lexile, Accelerated Reader), Brief Record Upgrade, and Reclassification from Dewey to LC. Contact us at 800-531-7678 or at info@marcive.com. We'd love to talk to you about the best solution for your bibliographic needs with a free analysis!
