“Just what I want!”

Stores which we have equipped with QUINCY SPECIAL SHOW CASES have developed a lot of brand new “Just what I want” business—from goods they had all along—only customers didn’t know it.

DON’T let your customers go out because of poor facilities for display. A postal will bring you our big 200 page CATALOG 22 (with 282 illustrations), showing Quincy Special equipment. If you care to send details about your store and rough pencil floor plan with measurements, we will gladly advise you, free, as to the best way to meet your store’s requirements.

Send for
CATALOG 22 anyway

for back and front of each photograph will be delivered. TIFFs should be 6000 pixels on the longest side and/or at least 600ppi.

(*Images should be named SIL-Bonney-IDCodeNo-[A or B] .TIFF. vendor will automatically assign an “A” to the front of the photograph and a “B” to the back for the ID # of the photos. These numbers will appear as a footer at the bottom of both the front and back of the digital image within a black outside border.

Original photographs will be removed from mylar sleeves prior to scanning. Photographs will be reinserted into mylar sleeves once each photo is digitized.

Descriptive Metadata information for each image will be provided by CHM Library in spreadsheet form that vendor will embed automatically from the spreadsheet without any additional cost. These fields are:

Deliverables

Re-keying should result in 17 plain text files with the text formatted as similarly as possible to the original text. All files must be in UTF8 character encoding to preserve all original diacritics. Line breaks are indicated as a CRLF (U+000D, U+000B) typical to a Windows-formatted text file. Blank lines between two sections are indicated with two line breaks. Embedded in the information for the book are tables of data. These may be difficult to handle, so they should simply be indicated as TABLE, and not re-keyed (see below.)

Option 1 General Rules

- Introduction sections can be omitted. Introductory text to the indexes can be omitted.
- The beginning of a new page is indicated with the word PAGE: in caps followed by the number of the page from the original scans.
- The running headers at the top of each page should be indicated with HEADING: in caps followed by the heading from the original scans.
