

Peeling the Onion with Fewer Tears: Cataloging in Primo/Alma to Enhance Discovery & Access – Chat Log

Donald Sensabaugh -> All Participants: In order to hear the presentation, you will need to connect your audio by either dialing in on the phone or by connecting through your computer speakers. To connect, click "Audio"; at the top and then "Audio conference" The pop-up box will give you the two options to connect. Follow the instructions in the box.

Donald Sensabaugh -> All Participants: If have any questions, please add them to the chat and send them to "All Participants"; or to "All Panelists"

Holly Chambers -> All Participants: Can't hear?

Charlie (she-her) Amiot -> All Participants: Can you get closer to the mic?

Kris Abery -> All Participants: In CT we've done this with both state and federal documents

Tekla Slider -> All Participants: How do you determine which is the Host Record vs. the related record? Is it the first number in the series/bound with volume?

Samantha Thorne -> All Participants: I assume the FRBR setting is something unique to/provided by Alma/Primo?

Robin Chan -> All Participants: We use the first bound piece in the volume as the host.

Tekla Slider -> All Participants: Ok, that makes sense. Thank you

Mary Russell -> All Participants: Are the #g with barcodes actually in the bib record, or the holding record, or are there item records with 773/4s in them?

Kris Abery -> All Participants: How do you make sure the HathiTrust links work over time? Do you update them or check them?

Charlie (she-her) Amiot -> All Participants: That had me laughing pretty hard.

Tekla Slider -> All Participants: I'm considering using the FDLP logo for images in the catalog when there isn't one tied to the ISBN.

James Noel -> All Participants: Records from Marcive do not include Hathi Trust links.

Shawn King -> All Participants: Do you publish from Alma to OCLC? Do those 773/774 fields publish out or no as they are localized?

Mary Russell -> All Participants: FRBR functionality is available in various cataloging software, but not all. It works a bit differently in each system

Marina Kolodyazhnaya -> All Participants: How are analytical series treated in Alma?

Lee Brockmeier -> All Participants: I missed whether these were stored in your ARC. What difficulties would you have storing these in your ARC?

Charlie (she-her) Amiot -> All Participants: My library is a member of a consortium and we're migrating "soon" from Aleph to ????, and this is going to be tremendously helpful, so thank you!

Abigail McDermott -> All Participants: Really impressive effort to tackle those problematic bound-withs! Huge compliment to the UCF team!

Samantha Thorne -> All Participants: Thank you! Very engaging presentation!

Kelly Smith -> All Participants: Thanks so much for the great presentation!

Elizabeth Salmon -> All Participants: Thank you!

Kate Peck -> All Participants: Thank you! Very informational!

Tien Triggs -> All Participants: Thank you!

Katherine Marshall -> All Participants: Thanks!
