Evaluating Uncataloged Collections Using Sampling: A Case Study – Chat Log:

from Korina Tueller to everyone:
Congratulations again to the State Library of Oregon and Portland State University Library for being named Federal Depository libraries of the year!

from Jenny Groome to everyone:
+1 Korina

from Donald Sensabaugh to everyone:
If you have any questions, please add them to the chat and send them to "Everyone."

from Sarah Erekson to everyone:
wow.

from Jenny Groome to everyone:
I still have Stan Price's tool for SuDoc sorting - so helpful to avoid lots of data clean up

from Trina Magi to everyone:
Jenny, can you say more about this tool and where it can be found?

from Elizabeth Eckert to everyone:
I'm also interested in this tool.

from David Walls to everyone:
Interesting project. Can you go over briefly how the titles got onto the list for shelf reading?

from Jenny Groome to everyone:
I don't know of SUDS is still available. I got it from Stan years ago. You input your spreadsheet into Access and then the tool adds leading zeros and such and sorts SuDocs numbers very well. Stan was already out of fed docs when I got the tool years ago.

from Lori Driver to everyone:
Yes, I would like to know about this tool too.

from Jenny Groome to everyone:
Anyone older timers here who use(s)(d) SUDS from Stan Price?

from Jen Kirk to everyone:
It's not Stan's tool but I use this method (with webcast) https://fdlp.gov/webcast-sorting-sudoc-call-numbers-in-excel

from Beth Downing to everyone:
#NAME?

from Jenny Groome to everyone:
I think this might be an updated version of the older tool. Or a newer tool with same idea.

from Sinai Wood to everyone:
http://course1.winona.edu/vleighton/autodocs/AutoFAQ15.html

from Sarah Erekson to everyone:
The pie charts - did you find that only 3-5 percents of those collections were uncataloged?

from Jenny Groome to everyone:
What I used was from Stan - 2014 SuDS - The SuDoc Number Sorter

from Arlene Weible to everyone:
I have a tool that is an Excel plugin that helped with SuDoc sorting, but it is not perfect.

from Jenny Groome to everyone:
Thanks Sinai

from David Walls to everyone:
Thanks!

from Jenny Groome to everyone:
Did Reed and U of O both keep up with SuDoc corrections? That can be an issue

from Jenny Groome to everyone:
I tend to use OpenRefine more these days.

from Jenny Groome to everyone:
Had inventories been done? For confidence in catalog holdings?

from Sinai Wood to everyone:
You're welcome @Jenny

from Trina Magi to everyone:
So it sounds like you trusted your catalogs to be accurate representations of what you own, and would have done somethin different if that were not true. I believe my catalog has records for things we didn't actually receive. so I would have to be careful.

from Gwen Sinclair to everyone:
So true, Arlene!

from Abby McDermott to everyone:
Great presentation, Arlene and David! Really impressive effort here to manage these congressional hearing collections in Oregon!

from Donald Sensabaugh to everyone:
Also, don't forget the Conference Bingo : https://www.fdlp.gov/sites/default/files/file_repo/conference-bingo-23.pdf with activities like completing the depository highlights field in the FDL Directory. Check out this video on how to update the field: https://vimeo.com/723334959.

from Kate Pitcher to everyone:

Thank you Arlene and David!

from Wanda Adams to everyone:
Thank you.

from Lori Driver to everyone:
Thank you

from Sarah Erekson to everyone:
