Does LOCKSS and/or USDocs work with library collections consortia (ex. GWLA, ASERL) for the "bring a friend" or other discounts? Or to get the word out?

from Bernadine Abbott Hoduski to everyone: 2:46 PM
thanks for your work

from Leslie Carr to everyone: 2:47 PM

from James Jacobs to everyone: 2:48 PM
thanks for the questions Leslie

from Becki White to everyone: 2:48 PM
I understand the idea of preserving the digital copies of the files. Does LOCKSS also provide access to these files, especially for those of us who are not members?

from Cass Hartnett to everyone: 2:55 PM
Very informative, one and all!

from James Jacobs to everyone: 2:56 PM
did you have a question Netta?

from Scott Briggs to everyone: 2:56 PM
You mentioned adding local digital repositories, would that info be available across the entire network?

from Danielle Gensch to everyone: 2:56 PM
Thank you all!

from Beth Downing to everyone: 2:58 PM
Is there a way to tell if we have harvested all of the content? How often is new content fed out to members?

from James Jacobs to everyone: 2:58 PM
local digital archives would more be a purview of the regional lockss networks. And every library in a network would share all of the content from all of the partners on the network

from James Jacobs to everyone: 3:01 PM
each member should have access to their local USDOCS admin site. There's a list in there of what archival units (AUs) are in the network and what AU's are waiting to be added

from James Jacobs to everyone: 3:02 PM
reach out to us Beth (Snowden, Beth is from Idaho State and a USDOCS member!)

from Beth Downing to everyone: 3:03 PM
I need to check with our systems staff to see if the problems we were having have been resolved.

from James Jacobs to everyone: 3:03 PM
+1 Beth

from Snowden Becker to everyone: 3:03 PM
