Adapting to Changes in Govt. Info. Management: Strategies and Tools to Keep You Out of the Weeds – Chat Log

from Pamela King to everyone: 1:01 PM
Should I be hearing the other presentation that is going on

from Amy Fitch to everyone: 1:01 PM
Nope

from Pamela King to everyone: 1:02 PM
Thank you i figured it out.

from Pamela King to everyone: 1:01 PM
Should I be hearing the other presentation that is going on

from Amy Fitch to everyone: 1:01 PM
Nope

from Pamela King to everyone: 1:02 PM
Thank you i figured it out.

from Chris Fox to everyone: 1:15 PM
From catalog.gpo.gov, can you export bib records? For example, I chose the Electronic Titles catalog, then under New Electronic Titles, I selected Last Month. Can I download those MARC records?

from David Isaak to everyone: 1:20 PM
You cannot download MARC records directly from the New Electronic Titles List. CGP has a working with results section in the help (https://catalog.gpo.gov/cgphelp/en/help.html). MARC records are available through z39.50, FDLP Data Manager, and GitHub.

from Mark Hamilton to everyone: 1:22 PM
Couldn't you also export the resulting list of OCLC numbers to do a batch download from OCLC? I have done something like that for State documents, so I assume it would work with OCLC numbers from the CGP.

from David Isaak to everyone: 1:22 PM
Yes, that would work as well.

from Kayleigh Thompson to everyone: 1:23 PM
How do you export results from a regular search on CGP?

from Paul Nease to everyone: 1:23 PM
Chris this is a great question! I've been wanting a monthly download of marc records for new electronic documents to be made available in github. I believe currently github has a new titles section but doesn't separate new physical titles from electronic

from Elizabeth McDonald to everyone: 1:24 PM
I

from Priya Subramanian to everyone: 1:24 PM
Now that MARCIVE is going away, we plan to obtain MARC records for online items from OCLC's Worldshare. However, Our ILS (Evergreen) seems to require a barcode for online records. This is so that the system does not think the record is empty and delete it during the yearly purge. MARCIVE was attaching the barcode for us until now. For those of you who get records from OCLC, did you come across this problem and how do you automatically attach barcodes to your online records in the catalog?

from Elizabeth McDonald to everyone: 1:24 PM
I think that OCLC separates electronic from print with their collection

from Stephen Kharfen to everyone: 1:24 PM
We are looking into creating monthly files of records for electronic/online publications and files of tangible publications.

from Becki White to everyone: 1:25 PM
Priya - our ebook records in PA's version of Evergreen don't require barcodes.

from Stephen Kharfen to everyone: 1:25 PM
We would post these files on GitHub.

from Elizabeth McDonald to everyone: 1:26 PM
You can use MarcEdit to add a 949 field (usually one used to create items at load)
I'm not sure how to have the barcodes update correctly

from Chris Fox to everyone: 1:27 PM
@Mark Hamilton -- How do you extract the OCLC numbers from the results list?

from Priya Subramanian to everyone: 1:27 PM
@ becki - so which attribute is it in the record that tells the system tht it is not an empty record. Our system deletes items without a barcode, but I know it is possible to tweak the record.....

from Becki White to everyone: 1:28 PM
@Priya - email me and I'll send you screenshots.

from Priya Subramanian to everyone: 1:28 PM
@ Becki - Thank you!

from Mark Hamilton to everyone: 1:28 PM
@ Chris Fox - I was referring to the same source that Susie O'Connor was, the New Electronic Titles list, either as a webpage or the .csv file.

from Chris Fox to everyone: 1:28 PM
@Paul Nease - yes, you're right. GitHub's new monthly records does contain a mix of formats. My thought would be to use MarcEdit to extract just the electronic ones

from Chris Fox to everyone: 1:29 PM
+1 Stephen Kharfen

from Stephen Kharfen to everyone: 1:30 PM
@Chris Fox and Paul Nease - Thank you very much for the suggestion.

from Elizabeth McDonald to everyone: 1:30 PM
Yes to Chris Fox

from Chris Fox to everyone: 1:31 PM

I'm not clear how OCLC Collection Manager, which does have a set of electronic records, works after the initial download. Can a non-FDLP library get ongoing updates of records?

from Alicia Kubas to everyone: 1:31 PM
@Kayleigh -- You cannot export MARC records from the CGP. You can email results to yourself to get the OCLC numbers and then go that route. Please see the CGP working with results section on the help page for more info: https://catalog.gpo.gov/cgphelp/en/help.html

from Kayleigh Thompson to everyone: 1:31 PM
I'm not looking to export records, just results with call #s and OCLC #s

from Stephen Kharfen to everyone: 1:32 PM
GPO's Metadata and Collection Services group has committed to providing a version of the monthly records via GitHub which are limited to the electronic only records. This work will be developed and should be available in the coming months.

from Elizabeth McDonald to everyone: 1:33 PM
@Paul Nease I can work with you on MarcEdit extract

from Paul Nease to everyone: 1:35 PM
This is great news! Thanks so much Stephen. And thanks for the offer Elizabeth.

from Stephen Kharfen to everyone: 1:36 PM
@Paul Nease - You're very welcome and thank you very much.

from Elisabeth Garner to everyone: 1:38 PM
It sounds like there may no longer be a way to download/import "changed" records as Brianna just mentioned, is that correct? (If using the FDM method at least)?

from Chris Fox to everyone: 1:38 PM
@Mark Hamilton You said "I was referring to the same source that Susie O'Connor was." Sorry but I missed that. Where is the New Electronic Titles List?

from Susan Ashby to everyone: 1:39 PM
Just to make sure I understand correctly, if we searchby our depository number
we'll be able to get all the available records based on our profile?

from Kim Allen to everyone: 1:39 PM
I thik the new electronic monthly archive reports are at
https://catalog.gpo.gov/F/K4HMMMJTYA6STQUHIU5YY6F3S7UGFMPDI2PTAT6C7A
LRJ4DK8V-68567?func=file&file_name=find-net&local_base=NEWTITLE#etitlemr

from John Wiley to everyone: 1:40 PM
Just want to already say a BIG thank you, Brianna, for this presentation.

from John Wiley to everyone: 1:40 PM
We just had to similarly go through a "what do we do without Marcive" process
and this has confirmed a lot of what we decided/found!

from Chris Fox to everyone: 1:40 PM
@Kim Allen - Thanks!

from Mark Hamilton to everyone: 1:41 PM
Thank you @Kim Allen. Yes, that is it @Chris Fox

from Alicia Kubas to everyone: 1:42 PM
@Kayleigh -- yes, you can export up to 20 results at a time to your email or save
them to a file. That will include the call number and OCLC number. there's step by
step instructions on the CGP help page: https://catalog.gpo.gov/cgphelp/en/help-
fdlp.html

from Mark Hamilton to everyone: 1:42 PM
It looks like the web page does not have OCLC numbers, but the .csv file does.

from Elizabeth McDonald to everyone: 1:42 PM
Brianna, How do you add item records in your system?

from Kayleigh Thompson to everyone: 1:42 PM
20 items is very limiting...

from Kayleigh Thompson to everyone: 1:43 PM
Thank you

from Thomas Fischlschweiger to everyone: 1:43 PM
Thank you Brianna. We also use Sirsi. I will be directing this presentation to our cataloging dept to see how we can use this to get our records.

from Chris Fox to everyone: 1:44 PM
We

from Chris Fox to everyone: 1:44 PM
We're a Sirsi library as well.

from Jessica Fomalont to everyone: 1:45 PM
As somebody who does the cataloging here at the GPO, I greatly appreciate seeing your workflow for our records.

from susanne Caro to everyone: 1:45 PM
+1 Thomas, I think Brianna's method will work for us too!

from Elizabeth McDonald to everyone: 1:46 PM
How will GPO be handling e resources that are no longer available in the future

from Emily Vieyra to everyone: 1:47 PM
Do all of you intend to keep putting records for online content into your ILS/public catalog? Or transitioning to linking those in another way?

from Mary Jo Heacock to everyone: 1:48 PM
Are the Electronics list, Collection Manager and FDM three different ways to get your records?   If we have OCLC, should we use Collection Manager or FDM?

from Emily Vieyra to everyone: 1:48 PM
Thank you

from Elizabeth McDonald to everyone: 1:48 PM
As I understand it Git Hub is all records and not able to be limited by selection profile. Is this correct?

from Chris Fox to everyone: 1:49 PM
@Mary -- that's our intention. To put electronic records into our catalog. That is, unless it proves to be too complicated and time-consuming to do so.

from Elizabeth McDonald to everyone: 1:49 PM
@Mary Jo Heacock I think Git Hub is one too

from Mary Jo Heacock to everyone: 1:50 PM
Thank you!

from Kim Allen to everyone: 1:50 PM
We have a lot of wcm collections, so we're likely to stick with that solution.. We already have a workflow for those

from Stephen Kharfen to everyone: 1:51 PM
@Elizabeth McDonaled - We add a note, No longer available as of, to the 856 40 PURL field.

from Kim Allen to everyone: 1:51 PM
wcm also allows you to share collections if you are in a consortium.

from Elizabeth McDonald to everyone: 1:51 PM
Brianna, I missed the company you named?

from Stephen Kharfen to everyone: 1:51 PM
Here is an example.

from Stephen Kharfen to everyone: 1:52 PM
CGP 000609795
Executive compensation disclosure
856 40 ‡z No longer available as of 7/17/09 ‡u
https://purl.fdlp.gov/GPO/LPS89312

from Elizabeth McDonald to everyone: 1:52 PM
@Stephen and then they are in changed records correct?

from David Isaak to everyone: 1:53 PM
@Elizabeth - Brianna is talking about OCLC services. You can see a webinar recording on it here: https://www.oclc.org/en/events/2024/how-to-receive-marc-records-for-us-gov-titles.html?utm_campaign=gov-doc-webinar&utm_medium=email&utm_source=webex&utm_content=webinar-how-to-receive-marc-records-for-gov-titles-event

from Stephen Kharfen to everyone: 1:54 PM
@Elizabeth McDonald - We do not provide files of records by selection profiles. The records include the item numbers in 074 fields.

from Morgan Mangold to everyone: 1:54 PM
Thank you Susie - will be reaching out on your Alma usage for this change!

from Elizabeth McDonald to everyone: 1:54 PM
@David Isaak thank you I watched that webinar eariler, I just didn't hear what she hasd said

from Pamela King to everyone: 1:54 PM
Here is the link to the information for OCLC to create a collection for you.

from Stephen Kharfen to everyone: 1:54 PM
@Elizabeth McDonald - You are correct. Thank you very much.

from Elizabeth McDonald to everyone: 1:55 PM
Will the Data Miner be updated to include changed records?

from Pamela King to everyone: 1:55 PM
OCLC link
https://help.oclc.org/Metadata_Services/WorldShare_Collection_Manager/Use_Collection_Manager_for_content_from_a_specific_provider/Providers_and_contacts_for_automatic_collection_loading/GPO

from Thomas Fischlschweiger to everyone: 1:55 PM
Emily, we are also looking into reducing our selections due to cost and staffing. We get about 500 records a month through MARCive, but I don't think we can handle

the workflow of keeping that level of throughput without the automated services that MARCive provided. We'll have to see what we will be able to accomodate.

from Becki White to everyone: 1:55 PM
Brianna - thank you! I downloaded your handouts and sent them to another library in my consortia who had concerns that I think your presentation addressed.

from Stephen Kharfen to everyone: 1:56 PM
Thank you very much!

from Elisabeth Garner to everyone: 1:56 PM
I think we're going with FDM, @Brianna, but enjoyed your presentation and found it helpful!

from Wanda Adams to everyone: 1:57 PM
Thank you for this presentation.

from Kim Allen to everyone: 1:57 PM
Thanks for the great ideas

from Morgan Mangold to everyone: 1:57 PM
This presentation will be so helpful! Thank you all for taking the time to share!!

from susanne Caro to everyone: 1:58 PM
Thank you! This has been really interesting and helpful!

from Mark Hamilton to everyone: 1:58 PM
Thank you, Brianna, Pamela, and Susie! This was really helpful!!

from Lori Driver to everyone: 1:58 PM
There are so many options

from Elizabeth McDonald to everyone: 1:58 PM
Thank you

from Ella Shurr to everyone: 1:58 PM

Thank you!

from Joshua Olsen to everyone: 1:58 PM
Thanks!

from Lori Driver to everyone: 1:58 PM
Thank you!!!

from Kathryn Bayer to everyone: 1:58 PM
Thanks very much!

from Brianna King - SCSL to everyone: 1:58 PM
Thank you everyone!

from Mary Ellen Lomax-Bellare to everyone: 1:58 PM
thank you

from Pamela King to everyone: 1:59 PM
Thank you all for coming and listening
