

Artificial Intelligence: The Good, the Bad, and the Messy - Chat Log

from Paul Levett to everyone: 2:48 PM

Writing AI prompts for querying PDF's

from Amanda Ros to everyone: 2:48 PM

differentiate between different tools

from Sarah Erikson, DLC to everyone: 2:48 PM

what should be on my radar

from Amanda Carter to everyone: 2:48 PM

How to be buy-in from management

from Becki White to everyone: 2:49 PM

Is using AI for most things worth the resources being expended on it?

from Mary Russell to everyone: 2:49 PM

What do I as a librarian NEED to know about AI today

from Beth Harper to everyone: 2:49 PM

How students are using AI in assignments

from Malea Walker to everyone: 2:49 PM

Hearing about how other people use AI in a functional way

from Lisa Pritchard to everyone: 2:49 PM

Learn about how other libraries are incorporating AI instruction .

from Ben Webb to everyone: 2:49 PM

What to do about hallucinations

from Suzanne Reinman to everyone: 2:49 PM

What are the main AI tools that we need to know!

from Charlie she-her Amiot, DLC to everyone: 2:49 PM

That everyone understands hallucinations, and that what we input as prompts is critical in quality of what is returned.

from Leslie Carr to everyone: 2:49 PM

AI for public users to benefit from

from Ronnie Joiner to everyone: 2:49 PM

Differences between different AI tools to help me talk to the public about them.

from Channa Cajero to everyone: 2:49 PM

AI instruction

from Cassandra Wenzel to everyone: 2:49 PM

Is there actually a use case for cataloging or tasks such as those?

from Trillian Hosticka to everyone: 2:49 PM

More about Analytic AI - most of what is being discussed in my hearing is about generative AI

from Susanne Caro to everyone: 2:49 PM

Should I fear our AI overloads- will it take my job?

from Bert Chapman to everyone: 2:49 PM

How to ensure students are not committing plagiarism/

from Bernadette Johnson to everyone: 2:49 PM

How can I benefit using AI.

from Jessica Robinson to everyone: 2:49 PM

Environmental impact vs actual use

from Daniel Cornwall to everyone: 2:49 PM

More about agentic AI

from Theresa Zahor to everyone: 2:49 PM

Clarification or info. about what other under grad schools are actively using AI and do they have administration and Info. Tech support on their campuses?

from Trina Magi to everyone: 2:49 PM

Who is REALLY benefitting from AI?

from Kate Wells to everyone: 2:49 PM

AI for enabling search vs utilizing AI with govt data for new content

from Trillian Hosticka to everyone: 2:50 PM

+1 Jessica Robinson

I worry about not just bias but wrong information that's believed to be fact because it's AI so it can't be wrong

from Sanga Sung to everyone: 2:53 PM

3

from Cassandra Wenzel to everyone: 2:53 PM

Same page Keven.

from Charlie she-her Amiot, DLC to everyone: 2:53 PM

Curious how many people here watched the Peacock/NBC show, Mrs. Davis. :D

from Ariella Mason to everyone: 2:53 PM

Glad no one said not concerned

from Daniel Cornwall to everyone: 2:53 PM

Especially power usage, harvesting public data for profit and building in biases.

from Charlie she-her Amiot, DLC to everyone: 2:53 PM
@Amy That concern exists regardless of AI.

from Patricia Rush to everyone: 2:53 PM
I watched Mrs. Davis - loved it

from Charlie she-her Amiot, DLC to everyone: 2:54 PM
@Patricia Interesting show, but I loved how it made you think about AI, and how much it got right, considering it predated the GPT launch.

from Amanda Carter to everyone: 2:54 PM
I just can never stop thinking about Norman:
<https://www.media.mit.edu/projects/norman/overview/>

from Sarah Dobransky to everyone: 2:54 PM
I recently learned that the Copyright office is allowing partially AI-generated works!
<https://www.copyright.gov/ai/>

from Patricia Rush to everyone: 2:54 PM
Yes it sure was and it did

from Sarah Dobransky to everyone: 2:55 PM
Need to hop on another meeting. Terrible timing!

from Lisa Pritchard to everyone: 2:55 PM
We've seen the use of Google Notebook this semester.

from Daniel Cornwall to everyone: 2:56 PM
I am intrigued about an LLM trained on the corpus of Government documents and data sets.

from Cassandra Wenzel to everyone: 2:56 PM
Law seems about half and half, depending upon the setting.

from Charlie she-her Amiot, DLC to everyone: 2:56 PM
@Cassandra I agree. It's chaos.

from Rich Gause to everyone: 2:56 PM
FYI - my university hosts a Teaching with AI Conference which includes sessions from librarians - end of May <https://digitallearning.ucf.edu/teachwithai/>

from Bruce Sarjeant to everyone: 2:57 PM
There are billions and billions of dollars betting on AI. The hype is deafening.

from Leslee Stover to everyone: 2:57 PM

ChatGPT has been helpful for little things, but I cannot imagine having it while I was in college. So glad we didn't have it (I've heard of students getting in trouble for plagiarism/using chat even if they don't use it)

from Mark Hamilton to everyone: 2:57 PM
+1 Daniel Cornwall

from Lisa Pritchard to everyone: 2:58 PM
Here's our guide. For our campus 547 Libguide hits is good. <https://libguides.jeffco.edu/aiguide>
We'd love to link to other guides if you'd like to share.

from Charlie she-her Amiot, DLC to everyone: 2:58 PM
Thought-provoking comment: What if they DO think? We don't actually know how they work. Who's to say some aren't thinking yet?

from Scott Briggs to everyone: 2:58 PM
+1 Leslee, heard from a colleague that they are using it all the time instead of creating their own thoughts.

from Kate Wells to everyone: 2:58 PM
+1 Daniel

from Cassandra Wenzel to everyone: 2:58 PM
@ Charlie, that's kind of that black box problem right?

from Charlie she-her Amiot, DLC to everyone: 2:59 PM
@Bruce it's amazing how much money is thrown around to people who sound like they know what they're talking about, but they're just buzzword users with another startup. The investors often lack the knowledge to realize the startups don't know what they're doing either. I suspect we'll see something like a dot-com boom/crash.

from Leslee Stover to everyone: 2:59 PM
Scott, some of them do! It's insane. But some are citing sources and then it gets flagged by the AI checker by the professor even if they don't use it. It's crazy lol

from Charlie she-her Amiot, DLC to everyone: 2:59 PM
@Cassandra Yes, kind of!

from Daniel Cornwall to everyone: 2:59 PM
Gemini has been also helpful in generating search terms and concepts "How would I research ..."

from David Cox to everyone: 2:59 PM
So I have been doing a lot of work on improving subject headings because the terminology itself is bad (especially for Indigenous materials) and also call numbers, so one thing I am concerned about for AI in the library realm is that any data we might train it on I would call bad data that needs human intervention to improve it before a computer ever gets involved

from Patricia Rush to everyone: 3:00 PM

My new PCP doctor used it for taking notes during my appointment - saves her time but what else is the info collected being used for?

from Mark Hamilton to everyone: 3:00 PM
Daniel - that's good to know. Thank you!

from Amanda Carter to everyone: 3:00 PM
Yes, David, what it is being trained on is the biggest issue/concern (at least, in my opinion)

from Teresa Ortiz to everyone: 3:00 PM
Book Recommendation:

from Jonathan Underwood to everyone: 3:01 PM
Does your University have an AI Academic Integrity/Plagiarism policy? How do they enforce it?

from Susanne Caro to everyone: 3:01 PM
My brother taught HS. He can always tell if they used AI. It tends to be in a totally different voice.

from Donis Marie Lambert to everyone: 3:01 PM
@ Charlie really interesting paper to read is ELIZA—a computer program for the study of natural language communication between man and machine
(<https://dl.acm.org/doi/10.1145/365153.365168>) it's about one of the first (if not the first) chatbots.

from Teresa Ortiz to everyone: 3:01 PM
Book Recommendation: Co-Intelligence by Ethan Mollick

from Jonathan Underwood to everyone: 3:02 PM
Donis,

from Jonathan Underwood to everyone: 3:02 PM
I tried the link and it did not work. I received a 404 error.

from Bert Chapman to everyone: 3:02 PM
In Spring 2026, I'll be teaching a graduate level Strategic Intelligence class (U.S. govt. intel agencies and congressional oversight) using CoPilot.

from Bernadine Abbott Hoduski to everyone: 3:02 PM
ai told me that I was the public printer

from Mark Hamilton to everyone: 3:03 PM
Congratulations, Bernadine!

from Bruce Sarjeant to everyone: 3:03 PM
Congratulations on your new job, Bernadine!

from Charlie she-her Amiot, DLC to everyone: 3:03 PM
For the neurodivergent, HIGHLY recommend <https://goblin.tools/>

from Jessica Robinson to everyone: 3:03 PM

One way to avoid the AI results in a Google search is to switch to the Web version of the search. Just to help the students that hate it.

from Kaitlyn Tanis to everyone: 3:04 PM

You can also add a curse word to your search on Google to get rid of AI too! A fun thing to mention to students!

from Deborah Yun Caldwell to everyone: 3:04 PM

the best hack

from Lara Adair to everyone: 3:04 PM

LOL

from Lisa Pritchard to everyone: 3:05 PM

@Bernadine--that's awesome

from Patricia Rush to everyone: 3:05 PM

Oooo Kaitlyn - thank you

from Lisa Pritchard to everyone: 3:05 PM

@Kaitlyn That's amazing.

from Donis Marie Lambert to everyone: 3:06 PM

@Jonathan hmm not sure why it is giving an error (maybe bc its trying to go through webx?) but the paper is called "ELIZA—a computer program for the study of natural language communication between man and machine" by Joseph Weizenbaum. You should be able to google and find it

from Andie Craley to everyone: 3:06 PM

Thanks for the Google tips! I have a Google pixel phone, and every search I do first has the AI results. I just did a search on "curse words and AI", and the first was AI telling me how to incorporate curse words into search queries on Google to temporarily disable the AI overview :)

from Catherine Morse to everyone: 3:07 PM

Yes this is true!

from Mark Caudill to everyone: 3:07 PM

@Jonathan @Donis try removing the trailing ")" from the URL

from Patricia Rush to everyone: 3:07 PM

Good old AI - giving you the info you need to disable it

from Becki White to everyone: 3:07 PM

I've been advising patrons to add "-ai" to their internet searches to avoid the AI overviews.

from Susanne Caro to everyone: 3:07 PM

But you can't bribe a robo TA!

from Ronnie Joiner to everyone: 3:07 PM

This also removes AI from Google search results. <https://udm14.com/>

from Kaitlyn Moody to everyone: 3:08 PM

I've enjoyed using AI for minor things in my library work, but with gov docs, even the potential for AI skewing important information is concerning. I know it was an issue with election info specifically (providing incomplete voting requirements, incorrect dates, etc.), and Microsoft even started an initiative to address issues with election specific information. How do we ethically integrate AI-use in the gov info sphere (specifically) when these complications exist? What's the best way to address these problems?

from Jon-Marc Dale to everyone: 3:08 PM

News is hot currently with Gemini for kids. Worth a look since the younger generation will shape our future.

from Bruce Sarjeant to everyone: 3:08 PM

Gemini for kids--get 'em hooked young!

from Charlie she-her Amiot, DLC to everyone: 3:08 PM

I use a paid sub to Poe, which gives me access to all the major models, via API and thus at a reduced cost. Big, big fan.

from Ben Webb to everyone: 3:10 PM

To Kaitlyn Moody's point: Lawyers using AI to write court briefs failed to notice the numerous errors and hallucinated cases the AI generated: <https://arstechnica.com/tech-policy/2025/04/mypillow-ceos-lawyers-used-ai-in-brief-citing-fictional-cases-judge-says/>

from Cassandra Wenzel to everyone: 3:11 PM

@Ben, there are a couple cases of that happening unfortunately.

from Charlie she-her Amiot, DLC to everyone: 3:11 PM

Rubber ducking!

from Colleen Williams to everyone: 3:12 PM

Above the Law frequently publishes articles on AI errors in court docs [abovethelaw.com](https://www.abovethelaw.com)

from Cassandra Wenzel to everyone: 3:12 PM

<https://www.reuters.com/technology/artificial-intelligence/ai-hallucinations-court-papers-spell-trouble-lawyers-2025-02-18/>

from Bruce Pencek to everyone: 3:12 PM

How to influence the AI developers to respect our libraries? AI harvester bots crashed our institutional repository for a few days last month, and I'm waiting for researchers across my campus to trigger alarms by scraping our licensed resources.

from Cassandra Wenzel to everyone: 3:12 PM

At least two times in that article alone. NY and WY.

from Charlie she-her Amiot, DLC to everyone: 3:12 PM

Let me reframe that for y'all: Lawyers, shirking their professional responsibilities, use a tool to not do their jobs.

from Amanda Ros to everyone: 3:12 PM

I know someone who received 6 identical cover letters for a job opening

from Donis Marie Lambert to everyone: 3:12 PM

I teach an intro to library research class and every term I've had a least one student "find" an article by Jane Doe or John Smith...

from Cassandra Wenzel to everyone: 3:13 PM

@Charlie, I work with some lovely lawyers who would never do that, but yeah. Always double check citations

from Deborah Yun Caldwell to everyone: 3:13 PM

Lessons that have students use AI, then go back and correct everything it did wrong have been more effective in both putting people off AI and getting them to actually do their work in my experience

from Charlie she-her Amiot, DLC to everyone: 3:14 PM

@Cassandra, as do I! But you know all of those firms have never used a citator to verify their law.

from Colleen Williams to everyone: 3:14 PM

And actually read the cases you cite

from Cassandra Wenzel to everyone: 3:14 PM

Probably not! They should ask a librarian!

from Scott Briggs to everyone: 3:14 PM

@Deborah, that's a great way to get the kids to do more of the work themselves.

from Deborah Yun Caldwell to everyone: 3:14 PM

by the end, if you're checking correctly it's at least the same if not more effort than just doing it correctly yourself the first time

from Sarah Pirila to everyone: 3:14 PM

6 identical cover letters for a job opening is insane!

from Charlie she-her Amiot, DLC to everyone: 3:14 PM

@Colleen, thus my point to, they're shirking their professional responsibilities. It's not the AI that's the problem. It's that person's competency and ethical beliefs.

from Cassandra Wenzel to everyone: 3:15 PM

Exactly, a tool can be used for good or ill.

from Colleen Williams to everyone: 3:15 PM

Yep, also proof they don't use KeyCite/Shepard's

from Charlie she-her Amiot, DLC to everyone: 3:16 PM
Penalties have not been severe enough.

from Amanda Carter to everyone: 3:19 PM
GenAI is here and it is not going away so it is important we learn how to best use it as a tool to benefit our work.

from Charlie she-her Amiot, DLC to everyone: 3:19 PM
+1 @Amanda

from Daniel Cornwall to everyone: 3:20 PM
Google - replicating practices of Lexis and Dialog in the 1980s/1990s. Free in school, \$\$\$\$ at work?

from Donis Marie Lambert to everyone: 3:20 PM
I'm just unsure of the ethics surrounding where these AI companies are getting the data used to train their ai models...

from Teresa Ortiz to everyone: 3:20 PM
New York Times - Hardfork podcast

from Becki White to everyone: 3:21 PM
+1 Daniel - I was remembering what was being offered to us in college and what we had to choose after graduation.

from Bruce Sarjeant to everyone: 3:21 PM
Is anyone going to read the user agreements or privacy policies?

from Anna Kirby to everyone: 3:21 PM
If you want to ignore all the ethical concerns beyond plagiarism (environmental issues, labor issues, privacy issues), how will any of these companies recoup all the venture capital funding they have been using up? The bills will come in soon - and I remember everyone saying crypto was going to be the money of the future and NFTs were going to be a part of all our live in just a few years.

from Amanda Carter to everyone: 3:22 PM
@Donis, the copyright is the biggest issue/challenge in using it, I think.

from Keven McGinn to everyone: 3:22 PM
EXCELLENT Presentation! Thanks.

from Jonathan Underwood to everyone: 3:22 PM
Kate, Excellent presentation! Thank you!

from Amanda Ros to everyone: 3:22 PM
great presentation

from Amy Laub, DLC to everyone: 3:22 PM
Fabulous presentation!

from Ella Shurr to everyone: 3:22 PM
Thank you, Kate!

from Sarah Pirila to everyone: 3:22 PM
Agreed with Anna

from Bernadette Johnson to everyone: 3:22 PM
Excellent presentation!

from Joshua Olsen to everyone: 3:22 PM
Awesome presentation!

from Brian Hamiton to everyone: 3:23 PM
Also agree with Anna

from Monica Dorame to everyone: 3:23 PM
Excellent information and presentation! Thank you Kate!

from Mark Hamilton to everyone: 3:23 PM
This was very helpful! Thank you, Kate!

from Channa Cajero to everyone: 3:23 PM
Great presentation, thank you!

from Becki White to everyone: 3:23 PM
Informative presentation on something I know very little. Thank you!

from Joshua Finnell, DLC to everyone: 3:23 PM
Thank you, Kate!

from Abby McDermott to everyone: 3:23 PM
Such an informative presentation on AI in an undergraduate university setting. I really enjoyed it.

from Stephen Kharfen to everyone: 3:23 PM
Thank you very much.

from Deborah Yun Caldwell to everyone: 3:23 PM
+1 Anna. Lots of claims, very little attempt at proving actual RIO.

from Cassandra Wenzel to everyone: 3:23 PM
Thank you!

from Andrea Stelljes, DLC to everyone: 3:23 PM
Thank you so much for presenting this information, Kate!

from Bert Chapman to everyone: 3:24 PM
Thank you for this insightful presentation!

from Lisa Pritchard to everyone: 3:24 PM

Thank you for this presentation. And, the chat was wonderful.

from Jonathan Underwood to everyone: 3:24 PM

Kate, that is an absolutely terrible policy. The University should set the policy for the entire University.

from Charlie she-her Amiot, DLC to everyone: 3:24 PM

Oooh, I want to way in on this chat about the copyright challenge. Think carefully about that. If I buy 20k books and manage to read them and keep my notes and use them for future work, that is legal. It becomes murkier when it's a computer, and we don't know if they're "paying for the books" they're using. BUT, it is the same concept. Intake and retain information. Perhaps our copyright laws are out of touch with reality.

from Daniel Cornwall to everyone: 3:24 PM

I'm an amateur photographer and I public post much less since image generative tools have come out. I have no evidence my photos have been harvested, but I use Facebook and Google for photo sharing, so probably.

from Susanne Caro to everyone: 3:24 PM

This sounds very helpful for congressional staffers and anyone who need a bill summary

from Angie Bonnell, DLC to everyone: 3:24 PM

This was fantastic! Thank you, Kate!!

from Andie Craley to everyone: 3:24 PM

What Kate just described - same here. We have no overall campus policy yet. It's class by class, professor by professor here...

from Kelly Smith, DLC to everyone: 3:24 PM

This was really great! Thanks so much!

from Teresa Ortiz to everyone: 3:25 PM

Book Recommendation: Nexus: A Brief History of Information Networks by Yuval Noah Harari

from Amanda Carter to everyone: 3:25 PM

@Charlie, I think you are right about our copyright laws being outdated.

from Charlie she-her Amiot, DLC to everyone: 3:25 PM

@Amanda IP law is complicated. Ignored in some places. Overly restrictive in others. Nobody is really getting it quite right I don't think.

from Mary Russell to everyone: 3:25 PM

Is GPO looking at creating an AI tool that draws only on the gov docs in their digital collection?

from Scott Matheson to everyone: 3:25 PM

To avoid using online tools, I've experimented with Jan on my laptop that runs several smaller models locally on your own computer.

from Lisa Pritchard to everyone: 3:26 PM
+1 Mary

from Amanda Carter to everyone: 3:26 PM
+5 @Charlie

from Charlie she-her Amiot, DLC to everyone: 3:26 PM
@Scott I keep forgetting to do this. Is Jan the front-runner right now? I know Llama had one.

from Teresa Ortiz to everyone: 3:26 PM
Book Recommendation: The Coming Wave by Mustafa Suleyman

from Daniel Cornwall to everyone: 3:26 PM
+1 Scott

from Cassandra Wenzel to everyone: 3:26 PM
I think this was posted earlier in the chat, but the US Copyright Office has produced some reports on AI and copyright: <https://www.copyright.gov/ai/>

from Scott Matheson to everyone: 3:26 PM
Cahrlye - I have Jan and Ollama (macOS) but Jan was most straightforward for me.

from Kaitlyn Moody to everyone: 3:26 PM
Thank you Kate! And thank you for all the book recs everyone

from Paul Levett to everyone: 3:26 PM
Increasing demand from faculty & students for library advice on responsible use of library materials with summary tools including Gemini & NotebookLM

from Susanne Caro to everyone: 3:27 PM
Thank you!

from Daniel Cornwall to everyone: 3:27 PM
Thank you! I'm going to be sharing your presentation recording and slides at work!

from Theresa Zahor to everyone: 3:27 PM
Very messy here right now. It gives me a headache. Thank you for all the wonderful info. Very helpful.

from Channa Cajero to everyone: 3:27 PM
Thank you!

from Charlie she-her Amiot, DLC to everyone: 3:27 PM
@Scott I was going to take my 12yo macbook that I've turned into a Linux and run it. I'm making a note of Jan tho!

from Samantha Thompson-Franklin to everyone: 3:27 PM
will Kate's slides be available

from Ashley Dahlen to everyone: 3:28 PM
Samantha - yes the slides, recording, and chat log will be available.

from Ashley Dahlen to everyone: 3:28 PM
You will get a link to everything via email when the archive is ready.

from Scott Matheson to everyone: 3:28 PM
@charlie - I haven't tried on my 12yo i5, but on the M2 Air it... flies...? (Haven't made comparisons but wow it seems fast to me.)

from Kelly Seifert to everyone: 3:28 PM
All slides are available here: <https://www.fdip.gov/file-repository/1105/handouts-slides>

from Charlie she-her Amiot, DLC to everyone: 3:29 PM
@scott I have an M1 iMac, but I really undershot the harddrive...

from Keven McGinn to everyone: 3:29 PM
Thanks, Kelly!

from Scott Matheson to everyone: 3:30 PM
@cahrlie - I think if the models are compiled for ARM, the M chips aren't too different - mine doesn't (didn't a few months ago) seem to use more than a few cores).

from Kelly Seifert to everyone: 3:31 PM
<https://www.fdip.gov/about/events-and-conferences/2025-depository-library-council-virtual-meeting>

from Kelly Seifert to everyone: 3:31 PM
Once the recordings are available, they will be accessible from our event page, linked above

from Charlie she-her Amiot, DLC to everyone: 3:31 PM
I have no excuse for not building my own offline model yet. I need to make that a higher priority.

from Scott Matheson to everyone: 3:31 PM
GPO AI Use Case Inventory

from Scott Matheson to everyone: 3:31 PM
<https://www.gpo.gov/explore-and-research/government-information/ai>

from Scott Matheson to everyone: 3:32 PM
(You may be able to guess the "product" type from some of the descriptions.)

from Charlie she-her Amiot, DLC to everyone: 3:33 PM
Oooh this is fun. Did this go out in the news blasts and I missed it?

from Scott Matheson to everyone: 3:34 PM

No- oversight required these inventories from (at least?) legislative branch agencies so they would know what AI tech is in use and what is being investigated/potential.

from Scott Matheson to everyone: 3:35 PM

<https://github.com/ombegov/2024-Federal-AI-Use-Case-Inventory/blob/main/README.md>

from Cassandra Wenzel to everyone: 3:35 PM

@Scott That is interesting, thanks!

from Scott Matheson to everyone: 3:35 PM

(Exect branch / OMB veriosn)

from Scott Matheson to everyone: 3:36 PM

LC: <https://blogs.loc.gov/thesignal/2023/11/introducing-the-lc-labs-artificial-intelligence-planning-framework/>

from Charlie she-her Amiot, DLC to everyone: 3:37 PM

I recently learned that Baltimore has a public computer lab with some high-powered machines. I feel like I need to reserve a computer for a few days and get to work.

from Becki White to everyone: 3:41 PM

Nothing like having to switch computers because I had to go to supper.
