

NASA Earth Exhibits and Programming for Libraries Chat Log

Lorelei Sensabaugh:

If you have any questions during the presentation, please put them in the chat and send to "Everyone."

Cindy Goode:

If you have time, could you describe in more detail how the Build Your Own experience works?

ellen cohen:

This is also all open source on windy.com

Lorelei Sensabaugh: There are visualizations available at Earth.gov: <https://earth.gov/>

ellen cohen:

Is there new information on the "Nasa at your library remote direct a satellite to take pictures of space? " The images that are generated are quite low res looking or grainy which does not hold attention of inner city teenagersIs there anyway I can have this activity available but make it more gamified or better resolution? Is there something another library is doing well that can be emulated? TY --Philadelphia

Cindy Goode:

Any grant opportunities to help pay for exhibits?

ellen cohen:

VR would be stolen even if we put an AirTag on it. We need something that is like on wheels but non theftable

Sara Winger:

Can these be focused to specific geographic areas?

Leslie Carr:

this is amazing! I know our library would be very interested in this

Marie Brennan:

This is a mazing! We are very interested!

Lorelei Sensabaugh:

<https://earth.gov/visit>

Raven Gregg:

Is there a cost to the library for the traveling exhibit?

Gilligan Maruzo:

Just to clarify - the 12 libraries you want to temporarily bring the EICs to over the next two years do pay for the screens etc. or do they simply apply for the opportunity to be selected?

Gilligan Maruzo:
Awesome, thank you!

ellen cohen:
How long would the traveling exhibit be on loan? It could be installed in the lobby ---okay answered
TY

Catherine Potter:
Will the non-digital materials be made available for general use?

Marie Brennan:
When we can we start applying to be considered for the travelling exhibit?

ellen cohen:
What if I install Ubuntu on a donated computer and have your livestream available on a table displaying both houseplants, seed library, but also a laptop streaming some of the temperature data is that also acceptable?

Cindy Goode:
Where is the application for the Traveling exhibit found?

Cindy Goode:
yep

ellen cohen:
We have a screen and projector is that not sufficient for livestreaming the content?

Sara Winger:
Thank you, this has been very interesting

Leslie Carr:
Thank you

Marie Brennan:
This is so interesting! Thank you so much!

Rebecca Mabanglo-Mayor:
Thank you! :)

Amy Fitch:
Thank you
